Subject Index

R = IUPAC Technical Report; Asterisk (*) = IUPAC Recommendations

AB INITIO POTENTIAL SURFACES
Coherent control for ultrafast photochemical reactions 525
ABSOLUTE MEASUREMENT
Molality-based standards of electrolytic conductivity 1783R
ABSORPTION INTENSITIES
Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon) 1521R
ACCELERATED SYNTHESIS
Solvent-free preparation of ionic liquids using a household microwave oven 1309
ACCURACY
Detecting and circumventing sources of inaccuracy in flow analysis 45
ACETALDEHYDE
Copper complexes for catalytic, aerobic oxidation of hydrocarbons 311
ACETOXYLATION OF ALKANES
New developments in transition metal-catalyzed synthetic reactions via C–H bond activation 319
ACETYLCHOLINESTERASE INHIBITORS
Bioactive natural products as a potential source of new pharmacophores. A theory of memory 555
ACETYLIDE
Molecular design of luminescent metal-based materials 543
ACIDITY
Gradient HPLC in the determination of drug lipophilicity and acidity 1465
ACRIDINES
Antitumor acridines with diaminoalkylo pharmacophoric group 1421
ACS STUDENT AFFILIATES
Greening the curriculum. American Chemical Society education programs 1247
ACTINIDE
Organometallic pentalene complexes 233
ADDITION
Chemistry of n5-fullerene metal complexes 355
ADSORPTION
Integrated emissions management for automotive painting operations 1277
ADSORPTION
Direct electrochemistry of nanoparticulate Fe_2O_3 in aqueous solution and adsorbed onto tin-doped indium oxide 1885
ADVANCED OXIDATION TECHNOLOGIES
Figures-of-merit for the technical development and application of advanced oxidation technologies for both electric- and solar-driven systems 627R
AEROBIC EPOXIDATION
Nanostructured amorphous metals, alloys, and metal oxides as new catalysts for oxidation 85
AEROBIC OXIDATION
Copper complexes for catalytic, aerobic oxidation of hydrocarbons 311
AFFINITY BIOSENSORS
Affinity electrochemical biosensors for pollution control 23
AFM
New inhibitors for copper corrosion 1861
AFRICA
American Chemical Society assistance to chemical scientists and engineers in developing countries 1221
AIR
Quasi-nature catalysis. Rhodium-catalyzed C–C bond formation in air and water 1315
AIR POLLUTION
Human exposure to traffic pollution. Experience from Danish studies 137
ALBUTEROL SULFATE
Low-temperature manufacturing of fine pharmaceutical powders with supercritical fluid aerosolization in a Bubble Dryer® 1299
ALCOHOLS
Copper complexes for catalytic, aerobic oxidation of hydrocarbons 311
ALKALI HALIDES
Solid-state solubility and its limits. The alkali halide case 807
ALKALINE EARTH METALS
Lewis-acidic organometallic compounds of the lanthanides and the alkaline earth metals as catalysts for the activation of carbonyl groups 279
ALKALOIDS
Biodiversity conservation and drug discovery in Suriname. Explorations in nature's combinatorial library 595
Efficient stereoselective syntheses of piperidine, pyrrolidine, and indolizidine alkaloids 573
ALKANE ACTIVATION
Alkane activation on a multimetallic site 315
ALKANES
Copper complexes for catalytic, aerobic oxidation of hydrocarbons 311
Organometallic alkane and noble-gas complexes in conventional and supercritical fluids 443
ALKYL COMPLEXES
Rare earth metal-based catalysts for the polymerization of nonpolar and polar monomers 351
ALKYLATION
Reactivity and selectivity under microwaves in organic chemistry. Relation with medium effects and reaction mechanisms 161
ALKYLIDENE
Reactions of d^0 alkylidene and amide complexes with silanes 331
ALKYNYLTUNGSTEN COMPOUNDS
Synthesis of oxygen heterocycles via alkynyltungsten compounds 265
1,2-ALLENYL METAL
Chemistry of 1,2-allenyl/propargyl metal species. A personal account 337
ALLYLATION
Asymmetric synthesis with "privileged" ligands 325
α-GLUCOSIDASE
Bioactive natural products as a potential source of new pharmacophores. A theory of memory 555
ALUMINIUM
Hydrolyzing metal salts as coagulants 2017
ALZHEIMER'S DISEASE
Bioactive natural products as a potential source of new pharmacophores. A theory of memory 555
AMBIENT
Quasi-nature catalysis. Rhodium-catalyzed C–C bond formation in air and water 1315
AMBIENT AIR POLLUTION
Human exposure to outdoor air pollution 933R
AMERICAN CHEMICAL SOCIETY
American Chemical Society assistance to chemical scientists and engineers in developing countries 1221
AMIDE
Reactions of d^0 alkylidene and amide complexes with silanes 331

AMIDITES
Applications of green chemistry in the manufacture of oligonucleotide drugs 175
AMINO ACIDS
Capillary electrophoretic techniques toward the metabolome analysis 1563
AMINOMETHYLATION OF ALKANES
New developments in transition metal-catalyzed synthetic reactions via C–H bond activation 319
AMINOPHOSPHONATES
Critical evaluation of stability constants of phosphonic acids 1641R
AMINOPHTHALIMIDE
Dynamic solvatochromism in solvent mixtures 405
AMINOSILANE
Reactions of d^0 alkylidene and amide complexes with silanes 331
AMMONIA
Chemical nitrogen fixation by using molybdenum and tungsten complexes 261
AMPEROMETRIC
Development of a new amperometric biosensor based on polyphenoloxidase and polyethersulphone membrane 1993
ANALGESIA
Opioid and sigma receptor studies. New developments in the design of selective sigma ligands 1499
ANALYTICAL CHEMISTRY
Selectivity in analytical chemistry 1381*
ANGIOSPERMS
Quantitative chemobiology 583
ANHARMONICITIES
Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon) 1521R
ANION COMPLEXATION
Calixphyrins. Hybrid macrocycles at the structural crossroads between porphyrins and calixpyrroles 1041
ANNHYDROBIFARNESOL
Natural products from around the world 567
ANODIC STRIPPING VOLTAMMETRY (ASV)
In situ speciation measurements. Using diffusive gradients in thin-films (DGT) to determine inorganically and organically complexed metals 9
ANTAGONISMS
Quantitative chemobiology 583
ANTICANCER AGENTS
Retinoic acid and analogs as potent inducers of differentiation and apoptosis. New promising chemopreventive and chemotherapeutic agents in oncology 1437
ANTIFEEDANT
Recent results from natural product research at the University of Botswana 1197
ANTIFUNGAL AGENTS
Rational design and synthesis of homochiral azole antifungal agents 1477
ANTI-INFLAMMATORY DRUGS
New developments in dimethyl carbonate chemistry 1117
ANTIMALARIAL
Bioactive compounds from coral reef invertebrates 589
ANTIMALARIAL DRUGS
From classical antimalarial drugs to new compounds based on the mechanism of action of artemisinin 1173
ANTIMETASTIC
New small-molecule tubulin inhibitors 1459
ANTIMICROBIAL
Recent results from natural product research at the University of Botswana 1197
ANTIOXIDANTS
Bioactive natural products as a potential source of new pharmacophores. A theory of memory 555
Recent results from natural product research at the University of Botswana 1197
ANTIPLASMODIAL
Recent results from natural product research at the University of Botswana 1197
ANTIPLATELET AGENTS
New chemical structures of hypolipidemic and antiplatelet activity 1445
ANTISENSE
Applications of green chemistry in the manufacture of oligonucleotide drugs 175
ANTITUMOR
Recent results from natural product research at the University of Botswana 1197
ANTITUMOR ACRIDINES
Antitumor acridines with diaminoalkylo pharmacophoric group 1421
APHIDS
Pheromones and kairomones for contol of pest insects. Some current results from a Swedish research program 607
APOPTOSIS
Retinoic acid and analogs as potent inducers of differentiation and apoptosis. New promising chemopreventive and chemotherapeutic agents in oncology 1437
AQUEOUS SOLUTIONS
Corresponding states for electrolyte solutions 1733
ARTEMISININ
From classical antimalarial drugs to new compounds based on the mechanism of action of artemisinin 1173
ARYL ALKYL KETONES
Selective biotransformation reactions on (±) aryl alkyl ketones, (±) benzoxazines, and D-arabino- and D-threo-hydroxyalkyltriazoles 167
ARYLOXIDE
Novel polymerization and copolymerization of ethylene, styrene, and/or butadiene by new organolanthanide-based catalysts 291
ASARONE ANALOGS
New chemical structures of hypolipidemic and antiplatelet activity 1445
ASSESSMENT
Risk assessment for occupational exposure to chemicals. A review of current methodology 993R
ASYMMETRIC ACTIVATION
Racemic catalysis through asymmetric activation 255
ASYMMETRIC CATALYSIS
Applications of "planar-chiral" heterocycles in asymmetric catalysis 1113
Asymmetric catalysis with "planar-chiral" heterocycles 347
Organometallic chemistry at the threshold of a new millennium. Retrospect and prospect 209
Recent applications of tricarbonyliron-diene complexes to organic synthesis 1075
ASYMMETRIC HYDROBORATION
Interplay of synthesis and mechanism in asymmetric homogeneous catalysis 343
ASYMMETRIC HYDROGENATION
Asymmetric hydrogenation via architectural and functional molecular engineering 227
Interplay of synthesis and mechanism in asymmetric homogeneous catalysis 343
New P-chirogenic diphosphines and their use in catalytic asymmetric reactions 373
Recent advances in asymmetric catalysis. Synthetic applications to biologically active compounds 299
ASYMMETRIC PHOTOCHEMISTRY
Vital role of entropy in photochirogenesis 475
ASYMMETRIC SYNTHESIS
Asymmetric synthesis by stereocontrol 283
Asymmetric synthesis with "privileged" ligands 325
Effect of ligands on divalent palladium-catalyzed carbon–carbon coupling reactions. Highly enantioselective synthesis of optically active γ-butyrolactones 247
Efficient stereoselective syntheses of piperidine, pyrrolidine, and indolizidine alkaloids 573
New P-chirogenic diphosphines and their use in catalytic asymmetric reactions 373
ATHEROSCLEROSIS
New chemical structures of hypolipidemic and antiplatelet activity 1445

ATOMIC SPECTROMETRY
Analytical advantages of using electrochemistry for atomic spectrometry 1
ATP
Selective detection of neurotransmitters by fluorescence and chemiluminescence imaging 1599
AUTOMOTIVE
Integrated emissions management for automotive painting operations 1277
1-AZABUTADIENES
Recent applications of tricarbonyliron-diene complexes to organic synthesis 1075
AZAZIRCONACYCLOPENTADIENE
Selective preparation of benzene derivatives from three different alkynes and pyridine derivatives from two different alkynes and a nitrile 271
AZOBENZENE
Microscopy and optical manipulation of dendrimer-built vesicles 435
AZOLE DERIVATIVES
Rational design and synthesis of homochiral azole antifungal agents 1477
BACILLUS SUBTILIS
Capillary electrophoretic techniques toward the metabolome analysis 1563
(BACTERIO-)CHLORIN DYAD
Electron-transfer dyads suitable for novel self-assembled light-harvesting antenna/electron-transfer devices 469
BARANGAMIDE
Bioactive compounds from coral reef invertebrates 589
BEETLES
Molecules and macromolecules involved in chemical communication of scarab beetles 613
BENZENE DERIVATIVE
Selective preparation of benzene derivatives from three different alkynes and pyridine derivatives from two different alkynes and a nitrile 271
BENZOXAZINES
Selective biotransformation reactions on (±) aryl alkyl ketones, (±) benzoxazines, and D-arabino- and D-threo-hydroxyalkyltriazoles 167
BIFUNCTIONAL CATALYSTS
Benign by design. New catalysts for an environmentally conscious age 1087
BIMETALLIC COMPLEXES
Cooperative bimetallic oxidative addition reactions 221
BIMETALLIC NANOPARTICLES
Benign by design. New catalysts for an environmentally conscious age 1087
BIMETALLIC REACTIVITY
Cooperative bimetallic oxidative addition reactions 221
BINAP
Racemic catalysis through asymmetric activation 255
BINAPS
Asymmetric hydrogenation via architectural and functional molecular engineering 227
BINOL
Asymmetric synthesis with "privileged" ligands 325
Racemic catalysis through asymmetric activation 255
BINUCLEAR COMPLEXES
Unsaturated binuclear homoletpic metal carbonyls $M_2(CO)_x$ (M = Fe, Co, Ni; x = 5, 6, 7, 8). Are multiple bonds between transition metals possible for these molecules? 1059
BIOACCUMULATION
Implementing green chemistry. An environmental policy for sustainability 1231
BIOAVAILABILITY
Speciation dynamics and bioavailability of metals. Exploration of the case of two uptake routes 39
BIOCATALYSTS
Benign by design. New catalysts for an environmentally conscious age 1087
Development of bioreactors for application of biocatalysts in biotransformations and bioremediation 77
BIODEGRADATION
Modeling lifetime and degradability of organic compounds in air, soil, and water systems 1331R
BIODIVERSITY
Biodiversity conservation and drug discovery in Suriname. Explorations in nature's combinatorial library 595
Pheromones and kairomones for contol of pest insects. Some current results from a Swedish research program 607
BIOEFFICACY
Isolation, identification, synthesis, and bioefficacy of female *Diacrisia obliqua* (Arctiidae) sex pheromone blend. An Indian agricultural pest 1157
BIOELECTROCATALYSIS
Development of a new amperometric biosensor based on polyphenoloxidase and polyethersulphone membrane 1993
BIOLOGICAL REMOVAL
Integrated emissions management for automotive painting operations 1277
BIOLOGICAL SUBSTANCES
Measurement and analysis of results obtained on biological substances with differential scanning calorimetry 745R
BIOLOGICALLY ACTIVE COMPOUNDS
Asymmetric hydrogenation via architectural and functional molecular engineering 227
BIOORGANOMETALLIC CHEMISTRY
Organometallic chemistry at the threshold of a new millennium. Retrospect and prospect 209
BIOREACTORS
Development of bioreactors for application of biocatalysts in biotransformations and bioremediation 77
BIOREMEDIATION
Bioremediation. An overview 1163
Development of bioreactors for application of biocatalysts in biotransformations and bioremediation 77
BIOSENSORS
Affinity electrochemical biosensors for pollution control 23
Development of a new amperometric biosensor based on polyphenoloxidase and polyethersulphone membrane 1993
BIOTRANSFORMATIONS
Chemistry and biotransformations in the Scrophulariaceae family 579
Development of bioreactors for application of biocatalysts in biotransformations and bioremediation 77
Selective biotransformation reactions on (±) aryl alkyl ketones, (±) benzoxazines, and D-arabino- and D-threo-hydroxyalkyltriazoles 167
BIOUPTAKE
Speciation dynamics and bioavailability of metals. Exploration of the case of two uptake routes 39
BIPHEP (BIPHENYL PHOSPHINE)
Racemic catalysis through asymmetric activation 255
BISPHOSPHONATES
Critical evaluation of stability constants of phosphonic acids 1641R
BISTABLE SYSTEMS
Organic photochromism 639R
BLEACHING
Use of TOF-SIMS for the analysis of surface metals in H_2O_2-bleached lignocellulosic fibers 2047
BLOOD ELECTROLYTES
Devices for ion-sensing and pX measurements 31
BONAGOTA
Pheromones and kairomones for contol of pest insects. Some current results from a Swedish research program 607
BRACKEN
Bracken adaptation mechanisms and xenobiotic chemistry 549
BRIDGING BISCYCLOPENTADIENYL LIGAND
Isolobal displacement methodology for the synthesis of transition-metal cluster complexes containing various biscyclopentadienyl ligands 305
BRINES
Treatment of Tunisian salt lakes using solubility phase diagrams 761
BROMINATING AGENTS
Peroxo metal-mediated environmentally favorable route to brominating agents and protocols for bromination of organics 93

BROMOORGANICS
Peroxo metal-mediated environmentally favorable route to brominating agents and protocols for bromination of organics 93
BUBBLE DRYER®
Low-temperature manufacturing of fine pharmaceutical powders with supercritical fluid aerosolization in a Bubble Dryer® 1299
BUTADIENE-STYRENE COPOLYMERIZATION
Novel polymerization and copolymerization of ethylene, styrene, and/or butadiene by new organolanthanide-based catalysts 291
γ-BUTYROLACTONES
Effect of ligands on divalent palladium-catalyzed carbon–carbon coupling reactions. Highly enantioselective synthesis of optically active γ-butyrolactones 247
BUXUS PAPILLOSA
Bioactive natural products as a potential source of new pharmacophores. A theory of memory 555
C60
New methods for the synthesis of transition-metal fullerene complexes 287
CAFFEATES
Quantitative chemobiology 583
CALCEOLARIA
Chemistry and biotransformations in the Scrophulariaceae family 579
CALCIUM OXALATE
Thermodynamic modeling of crystal deposition in humans 785
CALIBRATION
Standards in isothermal microcalorimetry 1625R
CALIXPHYRINS
Calixphyrins. Hybrid macrocycles at the structural crossroads between porphyrins and calixpyrroles 1041
CALORIMETRIC PRINCIPLES
Standards in isothermal microcalorimetry 1625R
CALORIMETRY
Measurement and analysis of results obtained on biological substances with differential scanning calorimetry 745R
Thermodynamic modeling of crystal deposition in humans 785
CANCER CHEMOTHERAPY
New small-molecule tubulin inhibitors 1459
CANDIDA ALBICANS
Rational design and synthesis of homochiral azole antifungal agents 1477
CANDIDA ANTARCTICA LIPASE
Selective biotransformation reactions on (±) aryl alkyl ketones, (±) benzoxazines, and D-arabino- and D-threo-hydroxyalkyltriazoles 167
CAPILLARY ELECTROPHORESIS
Capillary electrophoretic techniques toward the metabolome analysis 1563
CAPROLACTAM
Benign by design. New catalysts for an environmentally conscious age 1087
CARBAZOLE ALKALOIDS
Recent applications of tricarbonyliron-diene complexes to organic synthesis 1075
CARBENE ADDUCTS
Lewis-acidic organometallic compounds of the lanthanides and the alkaline earth metals as catalysts for the activation of carbonyl groups 279
CARBOALUMINATION
Some newer aspects of organozirconium chemistry of relevance to organic synthesis. Zr-Catalyzed enantioselective carbometallation 239
CARBOMETALLATION
Some newer aspects of organozirconium chemistry of relevance to organic synthesis. Zr-Catalyzed enantioselective carbometallation 239
CARBON DIOXIDE
Developments in CO_2 research 1281
Electrochemical approaches to alleviation of the problem of carbon dioxide accumulation 1917
CARBON MONOXIDE
New olefin polymerization and copolymerization catalysts. Effect of coordinating functionalities 251
CARBON–CARBON COUPLING
Effect of ligands on divalent palladium-catalyzed carbon–carbon coupling reactions. Highly enantioselective synthesis of optically active γ-butyrolactones 247
CARBONIMIDIC DICHLORIDE
Bioactive compounds from coral reef invertebrates 589
CARBONYL COMPOUNDS
Asymmetric synthesis with "privileged" ligands 325
Important photochemical processes in the atmosphere 487
CARBORANE
New class of metallacarboranes incorporating the η^7-carboranyl ligand 361
CARBOXYLATION OF ALKANES AND ARENES
New developments in transition metal-catalyzed synthetic reactions via C–H bond activation 319
CARNALLITE
Treatment of Tunisian salt lakes using solubility phase diagrams 761
CASE STUDIES
Greening the curriculum. American Chemical Society education programs 1247
CASSIOL
Studies directed toward the preparation of key intermediates for the synthesis of trisporic acids and cassiol 623
CATALYSIS
Catalysis for green chemistry 103
New methods for high-throughput synthesis 1103
Organometallic chemistry. Past, present, and future 205
Quasi-nature catalysis. Rhodium-catalyzed C–C bond formation in air and water 1315
Recent advances in asymmetric catalysis. Synthetic applications to biologically active compounds 299
CATALYSTS
Nanostructured amorphous metals, alloys, and metal oxides as new catalysts for oxidation 85
New olefin polymerization and copolymerization catalysts. Effect of coordinating functionalities 251
Recoverable catalysts. Ultimate goals, criteria of evaluation, and the green chemistry interface 1319
Unit "katal" for catalytic activity 927R
CATALYTIC ACTIVITY
Unit "katal" for catalytic activity 927R
CATALYTIC ACTIVITY CONCENTRATION
Unit "katal" for catalytic activity 927R
CATALYTIC APPLICATIONS
Organometallic chemistry at the threshold of a new millennium. Retrospect and prospect 209
CATALYZED RATE OF CONVERSION
Unit "katal" for catalytic activity 927R
CATION COORDINATION
Calixphyrins. Hybrid macrocycles at the structural crossroads between porphyrins and calixpyrroles 1041
CATIONS TRANSPORT
Extraction and separation of metal cations in solution by supported liquid membrane using lasalocid A as carrier 2039
CAVITATION OF RUBBER
Blends containing core-shell impact modifiers. Part 1: Structure and tensile deformation mechanisms 897R
CCR5 (HIV)
New developments in anti-HIV chemotherapy 55
CELL MODEL
Charge-stabilized colloidal suspensions. Phase behavior and effects of confinement 1705
CELL WALL
Gains achieved by molecular approaches in the area of lignification 561
CELLULAR PHONE
Strategy for globalization of chemical education based on the Internet 1125
CELLULOSE
Use of TOF-SIMS for the analysis of surface metals in H_2O_2-bleached lignocellulosic fibers 2047
C–H ACTIVATION BY METAL CATALYSTS
New developments in transition metal-catalyzed synthetic reactions via C–H bond activation 319

C–H BOND ACTIVATION
Alkane activation on a multimetallic site 315
CHAGAS' DISEASE
Strategies for the isolation and identification of trypanocidal compounds from the Rutales 617
CHALCOGENIDE
Molecular design of luminescent metal-based materials 543
CHALCOGENIDE SEMICONDUCTOR
Chalcogenide-based chemical sensors for atmospheric pollution control 2001
CHALCONES
Recent results from natural product research at the University of Botswana 1197
CHALEPIN
Strategies for the isolation and identification of trypanocidal compounds from the Rutales 617
CHARGE SEPARATION
Charge separation and energy transfer in multicomponent porphyrinic arrays 421
CHARGE TRANSFER
Long-distance charge transport through DNA. An extended hopping model 449
CHARGE-TRANSFER-TYPE EXCHANGE INTERACTION
Singlet and triplet energy splitting in the radical ion pairs generated by photoinduced electron-transfer reactions 519
CHELATING POLYMERS
Design, synthesis, and application of chelating polymers for separation and determination of trace and toxic metal ions. A green analytical method 181
CHEMCOM
Greening the curriculum. American Chemical Society education programs 1247
CHEMICAL COMMUNICATION
Supercritical fluid extraction of Z-sabinene hydrate-rich essential oils from Romanian mentha hybrids 1287
CHEMICAL DATABASE
Reliable solubility data in the age of computerized chemistry. Why, how, and when? 825
CHEMICAL DEVELOPMENT
Chemical development of the vasopressin receptor 2 antagonist SR-121463 1401
CHEMICAL ECOLOGY
Bracken adaptation mechanisms and xenobiotic chemistry 549
CHEMICAL GENOMICS
Combinatorial chemistry. Facing the challenge of chemical genomics 1487
CHEMICAL INFORMATION
Guidelines for the representation of pulse sequences for solution-state nuclear magnetic resonance spectrometry 1749*
JCAMP-DX. A standard format for the exchange of ion mobility spectrometry data 1765*
CHEMICAL SENSORS
Chalcogenide-based chemical sensors for atmospheric pollution control 2001
Devices for ion-sensing and pX measurements 31
CHEMICAL SHIFTS
NMR nomenclature. Nuclear spin properties and conventions for chemical shifts 1795*
CHEMICAL VAPOR DEPOSITION
Reactions of d^0 alkylidene and amide complexes with silanes 331
CHEMICALLY INDUCED DYNAMIC ELECTRON POLARIZATION
Singlet and triplet energy splitting in the radical ion pairs generated by photoinduced electron-transfer reactions 519
CHEMISTRY COMMUNICATION
Chemistry in the 21st century. A central science or a "back office" technical activity? 1229
CHEMISTRY DATA
Reliable solubility data in the age of computerized chemistry. Why, how, and when? 825
CHEMISTRY IN CONTEXT
Greening the curriculum. American Chemical Society education programs 1247
CHEMOREMEDIATION
Polymer-metal complexes for environmental protection. Chemoremediation in the aqueous homogeneous phase 129
CHEMOSENSORS
Molecular design of luminescent metal-based materials 543
CHIP
Miniaturization and chip technology. What can we expect? 1555
CHIRAL 1,2-DIAMINE
Asymmetric hydrogenation via architectural and functional molecular engineering 227
CHIRAL ALCOHOLS
Asymmetric hydrogenation via architectural and functional molecular engineering 227
CHIRAL LIGANDS
Applications of "planar-chiral" heterocycles in asymmetric catalysis 1113
Asymmetric catalysis with "planar-chiral" heterocycles 347
Asymmetric synthesis with "privileged" ligands 325
CHIRAL PHOSPHETANES
Recent advances in asymmetric catalysis. Synthetic applications to biologically active compounds 299
CHIRAL PHOSPHINE LIGANDS
New P-chirogenic diphosphines and their use in catalytic asymmetric reactions 373
CHIRAL RHODIUM CATALYST
New P-chirogenic diphosphines and their use in catalytic asymmetric reactions 373
CHIRALITY SWITCHING
Vital role of entropy in photochirogenesis 475
CHIRO ORGANIC PHOTOCHROMISM
Organic photochromism 639R
CHLORINATED PHENOLS
Oxidation of chlorophenols on Pt electrode in alkaline solution studied by cyclic voltammetry, galvanostatic electrolysis, and gas chromatography-mass spectrometry 1929
CHLOROMETHANES
Photocatalytic transformation of organic compounds in the presence of inorganic ions 1839
CHOLESTERIC
Definitions of basic terms relating to low-molar-mass and polymer liquid crystals 845*
CHROMATOGRAPHY
Retention parameters in chromatography. Part A. Hold-up volume concept in column chromatography. Part B. Retention parameters in gas chromatograpy 969*
CHROMIUM
Asymmetric synthesis with "privileged" ligands 325
CHYMOTRYPSIN
Bioactive natural products as a potential source of new pharmacophores. A theory of memory 555
CIDEP
Singlet and triplet energy splitting in the radical ion pairs generated by photoinduced electron-transfer reactions 519
1,4-*CIS* BUTADIENE LIVING POLYMERIZATION
Novel polymerization and copolymerization of ethylene, styrene, and/or butadiene by new organolanthanide-based catalysts 291
CLASS
Generic source-based nomenclature for polymers 1511*
CLAYAN
Green twist to old theme. An ecofriendly approach 199
CLEAN BROMINATION
Peroxo metal-mediated environmentally favorable route to brominating agents and protocols for bromination of organics 93
CLEAN ENERGY CONVERSION
Electrochemical technology for environmental treatment and clean energy conversion 1819
CLEAN SYNTHESIS
Catalysis for green chemistry 103
CLEAN TECHNOLOGY
Benign by design. New catalysts for an environmentally conscious age 1087
Solvent-free preparation of ionic liquids using a household microwave oven 1309
CLUSTER CROWN ETHER
Isolobal displacement methodology for the synthesis of transition-metal cluster complexes containing various biscyclopentadienyl ligands 305

COAGULATION
Hydrolyzing metal salts as coagulants 2017
COBALT
New methods for the synthesis of transition-metal fullerene complexes 287
COBALT OXIDE ON MCM-41
Nanostructured amorphous metals, alloys, and metal oxides as new catalysts for oxidation 85
COENZYME B_{12}
Organometallic chemistry at the threshold of a new millennium. Retrospect and prospect 209
COHERENT CONTROL
Coherent control for ultrafast photochemical reactions 525
COINAGE METAL IONS
Molecular design of luminescent metal-based materials 543
COLLOID TRANSPORT
Effect of colloids on radionuclide migration for performance assessment of HLW disposal in Japan 2027
COLLOIDS
Charge-stabilized colloidal suspensions. Phase behavior and effects of confinement 1705
Effect of colloids on radionuclide migration for performance assessment of HLW disposal in Japan 2027
Hydrolyzing metal salts as coagulants 2017
COLUMN CHROMATOGRAPHY
Retention parameters in chromatography. Part A. Hold-up volume concept in column chromatography. Part B. Retention parameters in gas chromatograpy 969*
COMBINATORIAL CHEMISTRY
Integrating natural product synthesis and combinatorial chemistry 1033
New methods for high-throughput synthesis 1103
COMBINATORIAL LIBRARIES
Combinatorial chemistry. Facing the challenge of chemical genomics 1487
Integrating natural product synthesis and combinatorial chemistry 1033
COMMISSION REPORTS (R = IUPAC TECHNICAL REPORT AND * = IUPAC RECOMMENDATIONS)
Commission on Atomic Weights and Isotopic Abundances 667–683R
Commission on Biophysical Chemistry 745–759R
Commission on Colloid and Surface Chemistry Including Catalysis 381–394*
Commission on Electroanalytical Chemistry 1783–1793R
Commission on Equilibrium Data 1641–1677R
Commission on Food 685–744R
Commission on General Aspects of Analytical Chemistry 1381–1386*
Commission on Macromolecular Nomenclature 845–895*; 1511–1519*
Commission on Molecular Structure and Spectroscopy 1521–1553R; 1795–1818*
Commission on Nomenclature of Inorganic Chemistry 377–380*; 959–967R
Commission on Nomenclature, Properties, and Units 927–931R
Commission on Photochemistry 627–637R; 639–665R
Commission on Polymer Characterization and Properties 897–912R; 913–926R
Commission on Separation Methods in Analytical Chemistry 969–992*
Commission on Thermodynamics 1349–1380R; 1625–1639R
Commission on Toxicology 933–958R; 993–1031R
Commission on Water and Soil Chemistry 1331–1348R
Committee on Printed and Electronic Publications 1749–1764*; 1765–1782*
COMMON CURRICULUM
Strategy for globalization of chemical education based on the Internet 1125
COMPETITIVE ION BINDING TO HUMICS
Humic matter and contaminants. General aspects and modeling metal ion binding 2005
COMPLEXATION
In situ speciation measurements. Using diffusive gradients in thin-films (DGT) to determine inorganically and organically complexed metals 9
Photoactive pyrene-containing receptors for transition-metal ions 411
COMPONENTS
Use of Legendre transforms in chemical thermodynamics 1349R
COMPUTER SIMULATIONS
Thermodynamic modeling of crystal deposition in humans 785
COMPUTERIZED DATA
Reliable solubility data in the age of computerized chemistry. Why, how, and when? 825
CONCENTRATION EFFECT
Vital role of entropy in photochirogenesis 475
CONCEPT
Organometallic chemistry. Past, present, and future 205
CONFERENCES/SYMPOSIA
Analytical Chemistry, 11th European Conference on (EUROANALYSIS XI), Lisbon, Portugal, 3–9 September 2000: 1–54
Analytical Sciences 2001, IUPAC International Congress on (ICAS2001), Tokyo, Japan, 6–10 August 2001: 1555–1623
Chemistry of Natural Products, 22nd IUPAC International Symposium on, São Carlos, Brazil, 3–8 September 2000: 549–626
Green Chemistry, International Symposium on, Delhi, India, 10–13 January 2001: 77–203
Green Chemistry: Toward Environmentally Benign Processes and Products, IUPAC CHEMRAWN XIV Conference on, Boulder, Colorado, USA, 9–13 June 2001: 1229–1330
8th International Chemistry Conference in Africa (8th ICCA), Dakar, Sénégal, 30 July–4 August 2001: 1147–1223
38th IUPAC Congress/World Chemistry Congress 2001, Brisbane, Australia, 1–6 July 2001: 1033–1145
Medicinal Chemistry, Hungarian–German–Italian–Polish Joint Meeting on, Budapest, Hungary, 2–6 September 2001: 1387–1509
Medicinal Chemistry, XVIth International Symposium on, Bologna, Italy, 18–22 September 2000: 55–75
Organometallic Chemistry, XIXth International Conference on (XIX ICOMC), Shanghai, China, 23–28 July 2000: 205–376
Photochemistry, XVIIIth IUPAC Symposium on, Dresden, Germany, 22–27 July 2000: 395–548
Solubility Phenomena, 9th IUPAC International Symposium on (9th ISSP), Hammamet, Tunisia, 25–28 July 2000: 761–844
Solution Chemistry, 27th International Conference on, Vaals, The Netherlands, 26–31 August 2001: 1679–1748
CONFOCAL FLUORESCENCE MICROSCOPY
Microscopy and optical manipulation of dendrimer-built vesicles 435
CONFORMATIONAL CHANGE
Molecular recognition at kappa opioid receptors 1387
CONICAL INTERSECTIONS
Coherent control for ultrafast photochemical reactions 525
CONJUGATED POLYMERS
Conjugated polymers. New materials for optoelectronic devices 425
CONSERVATION MATRICES
Use of Legendre transforms in chemical thermodynamics 1349R
CONSTRUCTIVIST MODEL
Teaching chemistry from a societal perspective 1209
CONTAMINANT BINDING TO HUMIC MATTER
Humic matter and contaminants. General aspects and modeling metal ion binding 2005
CONTINUOUS FLOW
New developments in dimethyl carbonate chemistry 1117
CONTROLLED POLYMERIZATION
Rare earth metal-based catalysts for the polymerization of nonpolar and polar monomers 351
COPOLYMER
Generic source-based nomenclature for polymers 1511*
COPOLYMERIZATION
New olefin polymerization and copolymerization catalysts. Effect of coordinating functionalities 251
COPPER
In situ speciation measurements. Using diffusive gradients in thin-films (DGT) to determine inorganically and organically complexed metals 9
COPPER CATALYST
Copper complexes for catalytic, aerobic oxidation of hydrocarbons 311
COPPER CORROSION
New inhibitors for copper corrosion 1861

CORANNULENE
Recent applications of tricarbonyliron-diene complexes to organic synthesis 1075
CORRESPONDING STATES
Corresponding states for electrolyte solutions 1733
COUMARINS
New developments in transition metal-catalyzed synthetic reactions via C–H bond activation 319
COUMARINS
Strategies for the isolation and identification of trypanocidal compounds from the Rutales 617
COUPLING
Chemistry of 1,2-allenyl/propargyl metal species. A personal account 337
COUPLING OF ARENES AND OLEFINS
New developments in transition metal-catalyzed synthetic reactions via C–H bond activation 319
COX-MERZ RULE
Blends containing core-shell impact modifiers. Part 2: Melt rheology of rubber-toughened plastics 913R
CRITICAL EVALUATION
Critical evaluation of stability constants of phosphonic acids 1641R
CRYSTAL CHEMICAL FORMULA
Nomenclature of structural and compositional characteristics of ordered microporous and mesoporous materials with inorganic hosts 381*
CRYSTALLINE COMPLEX
Crystalline inclusion complexes as media of molecular recognitions and selective reactions 1137
CXCR4 (HIV)
New developments in anti-HIV chemotherapy 55
CYANOGENESIS
Bracken adaptation mechanisms and xenobiotic chemistry 549
CYCLIC
Generic source-based nomenclature for polymers 1511*
CYCLIC PENTAPEPTIDE
Natural products from around the world 567
CYCLIC PEPTIDE
Bioactive compounds from coral reef invertebrates 589
CYCLIC VOLTAMMETRY
Oxidation of chlorophenols on Pt electrode in alkaline solution studied by cyclic voltammetry, galvanostatic electrolysis, and gas chromatography-mass spectrometry 1929
CYCLODEHYDRATION
Green twist to old theme. An ecofriendly approach 199
CYCLOHEXANE OXIDATION
Nanostructured amorphous metals, alloys, and metal oxides as new catalysts for oxidation 85
CYCLOPENTADIENE
Chemistry of n5-fullerene metal complexes 355
CYDIA
Pheromones and kairomones for contol of pest insects. Some current results from a Swedish research program 607
CYMANTRENE
Fullerenes covalently linked to transition metals with organic ligands 275
CYSTINE
Thermodynamic modeling of crystal deposition in humans 785
CYTOTOXIN
Bioactive compounds from coral reef invertebrates 589
D-24851
New small-molecule tubulin inhibitors 1459
D-ARABINO-POLYHYDROXYLALKYL TRIAZOLES
Selective biotransformation reactions on (±) aryl alkyl ketones, (±) benzoxazines, and D-arabino- and D-threo-hydroxyalkyltriazoles 167
DATA ARCHIVING
JCAMP-DX. A standard format for the exchange of ion mobility spectrometry data 1765*
DATA EXCHANGE
Guidelines for the representation of pulse sequences for solution-state nuclear magnetic resonance spectrometry 1749*
JCAMP-DX. A standard format for the exchange of ion mobility spectrometry data 1765*
DATA STANDARDS
Guidelines for the representation of pulse sequences for solution-state nuclear magnetic resonance spectrometry 1749*
JCAMP-DX. A standard format for the exchange of ion mobility spectrometry data 1765*
DATABASE
Strategy for globalization of chemical education based on the Internet 1125
DDT
Status of organochlorine (DDT) pollutants and steps toward electrocatalytic reductions 1907
DEFENSE SUBSTANCE
Recent results in the synthesis of ecologically important bioregulators 601
DEGRADATION
Modeling lifetime and degradability of organic compounds in air, soil, and water systems 1331R
Use of TOF-SIMS for the analysis of surface metals in H_2O_2-bleached lignocellulosic fibers 2047
DENDRIMER
Microscopy and optical manipulation of dendrimer-built vesicles 435
DEPROTECTION
Green twist to old theme. An ecofriendly approach 199
DESIGNING
Design, synthesis, and application of chelating polymers for separation and determination of trace and toxic metal ions. A green analytical method 181
DETECTION LIMIT
A glance into the bulk of solvent polymeric pH membranes 17
DETERMINATION
Design, synthesis, and application of chelating polymers for separation and determination of trace and toxic metal ions. A green analytical method 181
DEUTERIUM
Names for muonium and hydrogen atoms and their ions 377*
DEVELOPMENT
American Chemical Society assistance to chemical scientists and engineers in developing countries 1221
Centre for Green Chemistry, Monash University, Australia 1251
DIABETES MELLITUS
Semicarbazide-sensitive amine oxidase. Its physiological significance 1393
DIACRISIA OBLIQUA
Isolation, identification, synthesis, and bioefficacy of female *Diacrisia obliqua* (Arctiidae) sex pheromone blend. An Indian agricultural pest 1157
DIAMINOALKYL ACRIDINES
Antitumor acridines with diaminoalkylo pharmacophoric group 1421
DIAMOND ANVIL
Phase diagrams at high temperature and high pressure. Determination and consequent developments 771
(3S,7S)-DIANEACKERONE
Some newer aspects of organozirconium chemistry of relevance to organic synthesis. Zr-Catalyzed enantioselective carbometallation 239
DIASTEREOSELECTIVITY
Asymmetric synthesis by stereocontrol 283
DIAZA-ADAMANTANE ALKALOIDS
Natural products from around the world 567
DIAZOKETONES
Fullerenes covalently linked to transition metals with organic ligands 275
DICHLORO(BISNEOMENTHYLINDENYL) ZIRCONIUM
Some newer aspects of organozirconium chemistry of relevance to organic synthesis. Zr-Catalyzed enantioselective carbometallation 239
DIELECTRIC BEHAVIOR
Corresponding states for electrolyte solutions 1733
DIELECTRIC CONSTANT
Theories of structural and dynamic properties of ions in discrete solvents. Application to magnetic resonance imaging 1689
DIELS–ALDER CYCLIZATION
Asymmetric synthesis by stereocontrol 283

DIFFERENTIAL SCANNING CALORIMETRY
Measurement and analysis of results obtained on biological substances with differential scanning calorimetry 745R
DIFFERENTIATION
Retinoic acid and analogs as potent inducers of differentiation and apoptosis. New promising chemopreventive and chemotherapeutic agents in oncology 1437
DIFFUSION
In situ speciation measurements. Using diffusive gradients in thin-films (DGT) to determine inorganically and organically complexed metals 9
DIFFUSION BARRIER MATERIALS
Reactions of d^0 alkylidene and amide complexes with silanes 331
DIFFUSIVE GRADIENTS IN THIN FILMS (DGT)
In situ speciation measurements. Using diffusive gradients in thin-films (DGT) to determine inorganically and organically complexed metals 9
DIMERIZATION
Asymmetric synthesis by stereocontrol 283
DIMETHYL CARBONATE
New developments in dimethyl carbonate chemistry 1117
DIPOLE MOMENTS
Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon) 1521R
DIRECT ELECTROCHEMISTRY
Direct electrochemistry of redox proteins or enzymes at various film electrodes and their applications in monitoring some pollutants 1979
DISCOVERY
Continuing evolution of the drug discovery process in the pharmaceutical industry 67
On the discovery of the elements 110-112 959R
DISEASE
Continuing evolution of the drug discovery process in the pharmaceutical industry 67
DISPOSABLE BIOSENSORS
Affinity electrochemical biosensors for pollution control 23
DISSIPATION
Status of organochlorine (DDT) pollutants and steps toward electrocatalytic reductions 1907
DISSOCIATION ENERGIES
Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon) 1521R
DMAP
Applications of "planar-chiral" heterocycles in asymmetric catalysis 1113
Asymmetric catalysis with "planar-chiral" heterocycles 347
DNA
Long-distance charge transport through DNA. An extended hopping model 449
Measurement and analysis of results obtained on biological substances with differential scanning calorimetry 745R
DNA ARRAY
Threading intercalation to double-stranded DNA and the application to DNA sensing. Electrochemical array technique 1573
DNA BIOSENSORS
Affinity electrochemical biosensors for pollution control 23
DNA DAMAGE
Affinity electrochemical biosensors for pollution control 23
DNA IMMOBILIZATION
Affinity electrochemical biosensors for pollution control 23
DNA SENSING
Threading intercalation to double-stranded DNA and the application to DNA sensing. Electrochemical array technique 1573
DNA-MEMBRANE INTERACTIONS
Charge-stabilized colloidal suspensions. Phase behavior and effects of confinement 1705
DOPAMINE D4 RECEPTOR
Combinatorial chemistry. Facing the challenge of chemical genomics 1487
DOUBLE CLUSTER
Isolobal displacement methodology for the synthesis of transition-metal cluster complexes containing various biscyclopentadienyl ligands 305
DRIVERS
Continuing evolution of the drug discovery process in the pharmaceutical industry 67
DRUGS
Continuing evolution of the drug discovery process in the pharmaceutical industry 67
DRUG DISCOVERY
Biodiversity conservation and drug discovery in Suriname. Explorations in nature's combinatorial library 595
DRY CLEANING
Developments in CO_2 research 1281
DRY MEDIA
Dry media reactions 147
Green twist to old theme. An ecofriendly approach 199
D-THREO-POLYHYDROXYALKYL TRIAZOLES
Selective biotransformation reactions on (±) aryl alkyl ketones, (±) benzoxazines, and D-arabino- and D-threo-hydroxyalkyltriazoles 167
DUAL-MODE ORGANIC PHOTOCHROMISM
Organic photochromism 639R
DYNAMICS
Speciation dynamics and bioavailability of metals. Exploration of the case of two uptake routes 39
EDUCATION
Centre for Green Chemistry, Monash University, Australia 1251
EFFECTIVE QUANTUM YIELDS
Important photochemical processes in the atmosphere 487
ELECTRIC ENERGY EFFICIENCY
Figures-of-merit for the technical development and application of advanced oxidation technologies for both electric- and solar-driven systems 627R
ELECTRICAL CONDUCTANCE
Corresponding states for electrolyte solutions 1733
ELECTROANALYSIS
Devices for ion-sensing and pX measurements 31
ELECTROCARBOXYLATION
Electrochemical approaches to alleviation of the problem of carbon dioxide accumulation 1917
ELECTROCATALYSIS
Direct electrochemistry of redox proteins or enzymes at various film electrodes and their applications in monitoring some pollutants 1979
ELECTROCHEMICAL BIOSENSORS
Affinity electrochemical biosensors for pollution control 23
ELECTROCHEMICAL DETECTION
Threading intercalation to double-stranded DNA and the application to DNA sensing. Electrochemical array technique 1573
ELECTROCHEMICAL SENSORS
Electrochemical sensors for environmental monitoring. Strategy and examples 1969
ELECTROCHEMICAL TECHNOLOGY
Electrochemical technology for environmental treatment and clean energy conversion 1819
ELECTROCHEMISTRY
Electrochemical approaches to alleviation of the problem of carbon dioxide accumulation 1917
Green electrochemistry. Examples and challenges 1305
ELECTRODE DESIGN
Electrochemical technology for environmental treatment and clean energy conversion 1819
ELECTRODEPOSITION OF NOBLE METALS MODIFIER
Analytical advantages of using electrochemistry for atomic spectrometry 1
ELECTROLUMINESCENCE
Conjugated polymers. New materials for optoelectronic devices 425
ELECTROLYSIS
Degradation of dye effluent 1957
Dissolution and formation of nuclear materials in molten media 799
ELECTROLYTE SOLUTIONS
Corresponding states for electrolyte solutions 1733

ELECTROLYTE THERMODYNAMICS
Corresponding states for electrolyte solutions 1733
ELECTROLYTIC CONDUCTIVITY
Molality-based standards of electrolytic conductivity 1783R
ELECTROLYTIC PRECONCENTRATION
Analytical advantages of using electrochemistry for atomic spectrometry 1
ELECTRON TRANSFER
Charge separation and energy transfer in multicomponent porphyrinic arrays 421
Twentieth century developments in photochemistry. Brief historical sketches 395
ELECTRON-ELECTRON RELAXATION
Ultrafast dynamics at solid/liquid interfaces as investigated by photothermal spectroscopy 1613
ELECTROOXIDATION
Biphasic sonoelectrosynthesis. A review 1947
ELECTROREDUCTION
Biphasic sonoelectrosynthesis. A review 1947
ELECTROSYNTHESIS
Green synthesis via electrolysis in microemulsions 1895
ELEMENTARY STEPS
Organometallic chemistry at the threshold of a new millennium. Retrospect and prospect 209
ELEMENTS
On the discovery of the elements 110-112 959R
ENANTIOMERIC SELECTIVITY
Asymmetric synthesis by stereocontrol 283
ENANTIOMERS
Opioid and sigma receptor studies. New developments in the design of selective sigma ligands 1499
ENANTIOSELECTIVE
Effect of ligands on divalent palladium-catalyzed carbon–carbon coupling reactions. Highly enantioselective synthesis of optically active γ-butyrolactones 247
ENANTIOSELECTIVE SYNTHESIS
Recent results in the synthesis of ecologically important bioregulators 601
Some newer aspects of organozirconium chemistry of relevance to organic synthesis. Zr-Catalyzed enantioselective carbometallation 239
ENE REACTION
Racemic catalysis through asymmetric activation 255
ENERGY CONVERSION
Electrochemical technology for environmental treatment and clean energy conversion 1819
ENERGY TRANSFER
Charge separation and energy transfer in multicomponent porphyrinic arrays 421
Electron-transfer dyads suitable for novel self-assembled light-harvesting antenna/electron-transfer devices 469
Photoactive pyrene-containing receptors for transition-metal ions 411
ENTHALPY
Use of Legendre transforms in chemical thermodynamics 1349R
ENTROPY CHEMISTRY
Vital role of entropy in photochirogenesis 475
ENVIRONMENT
Green electrochemistry. Examples and challenges 1305
ENVIRONMENTAL CHEMISTRY
Teaching chemistry from a societal perspective 1209
ENVIRONMENTAL METRICS
Sustainability metrics for vehicles 1273
ENVIRONMENTAL MONITORING
Chalcogenide-based chemical sensors for atmospheric pollution control 2001
Electrochemical sensors for environmental monitoring. Strategy and examples 1969
ENVIRONMENTAL REMEDIATION
Titania-based heterogeneous photocatalysis. Materials, mechanistic issues, and implications for environmental remediation 1849
ENVIRONMENTAL TREATMENT
Electrochemical technology for environmental treatment and clean energy conversion 1819
ENYNES
Effect of ligands on divalent palladium-catalyzed carbon–carbon coupling reactions. Highly enantioselective synthesis of optically active γ-butyrolactones 247
ENZYMES
Direct electrochemistry of redox proteins or enzymes at various film electrodes and their applications in monitoring some pollutants 1979
Molecules and macromolecules involved in chemical communication of scarab beetles 613
ESIPT
Quinone methide intermediates in organic photochemistry 529
Unit "katal" for catalytic activity 927R
ENZYME UNIT
Unit "katal" for catalytic activity 927R
ESSENTIAL OILS
Supercritical fluid extraction of Z-sabinene hydrate-rich essential oils from Romanian mentha hybrids 1287
ETHNOBOTANY
Quantitative chemobiology 583
ETHYLENE-STYRENE COPOLYMERIZATION
Novel polymerization and copolymerization of ethylene, styrene, and/or butadiene by new organolanthanide-based catalysts 291
EUPHORE REACTOR
Important photochemical processes in the atmosphere 487
EVOLUTION
Continuing evolution of the drug discovery process in the pharmaceutical industry 67
EVOLUTIONARY MODELING
Quantitative chemobiology 583
EXCIMER
Photoactive pyrene-containing receptors for transition-metal ions 411
EXCITED-STATE INTRAMOLECULAR PROTON TRANSFER
Quinone methide intermediates in organic photochemistry 529
EXPERIMENTS
Teaching green chemistry. Third-year-level module and beyond 1257
EXPLORATORY PHOTOCHEMISTRY
Twentieth century developments in photochemistry. Brief historical sketches 395
EXPOSURE
Risk assessment for occupational exposure to chemicals. A review of current methodology 993R
EXPOSURE ASSESSMENT STRATEGIES
Human exposure to outdoor air pollution 933R
FAMILIES OF PHOTOCHROMIC COMPOUNDS
Organic photochromism 639R
FAST SCREENING METHODS
Benign by design. New catalysts for an environmentally conscious age 1087
FE_2O_3
Direct electrochemistry of nanoparticulate Fe_2O_3 in aqueous solution and adsorbed onto tin-doped indium oxide 1885
FEEDSTOCK
Green chemistry as systems science 1243
FERROCENE
Fullerenes covalently linked to transition metals with organic ligands 275
Threading intercalation to double-stranded DNA and the application to DNA sensing. Electrochemical array technique 1573
FERROCENYLPHOSPHINES
Fullerenes covalently linked to transition metals with organic ligands 275
FIELD TRIAL
Isolation, identification, synthesis, and bioefficacy of female *Diacrisia obliqua* (Arctiidae) sex pheromone blend. An Indian agricultural pest 1157
FILM ELECTRODES
Direct electrochemistry of redox proteins or enzymes at various film electrodes and their applications in monitoring some pollutants 1979
FLASH VACUUM PYROLYSIS
Recent applications of tricarbonyliron-diene complexes to organic synthesis 1075

FLAVONOIDS
Recent results from natural product research at the University of Botswana 1197
FLOATING ZONE
Phase diagrams at high temperature and high pressure. Determination and consequent developments 771
FLOCCULATION
Hydrolyzing metal salts as coagulants 2017
FLOW ANALYSIS
Detecting and circumventing sources of inaccuracy in flow analysis 45
FLOW INJECTION ANALYSIS
Detecting and circumventing sources of inaccuracy in flow analysis 45
FLUORESCENCE
Dynamic solvatochromism in solvent mixtures 405
Luminescent sensors and photonic switches 503
Microscopy and optical manipulation of dendrimer-built vesicles 435
Photoactive pyrene-containing receptors for transition-metal ions 411
FLUOROACRYLATES
Developments in CO_2 research 1281
FLUOROOLEFINS
Developments in CO_2 research 1281
FOODS
Quantitative chemobiology 583
FRAGMENTATION
New approach to silver halide photography using radical cation chemistry 455
FRAMEWORK STRUCTURES
Nomenclature of structural and compositional characteristics of ordered microporous and mesoporous materials with inorganic hosts 381*
FULLERENES
Electron-transfer dyads suitable for novel self-assembled light-harvesting antenna/electron-transfer devices 469
Chemistry of n5-fullerene metal complexes 355
Fullerenes covalently linked to transition metals with organic ligands 275
FULLERENE COMPLEXES
New methods for the synthesis of transition-metal fullerene complexes 287
FUNCTIONAL DYES
Calixphyrins. Hybrid macrocycles at the structural crossroads between porphyrins and calixpyrroles 1041
FUNDAMENTAL EQUATIONS
Use of Legendre transforms in chemical thermodynamics 1349R
FUSION (HIV)
New developments in anti-HIV chemotherapy 55
G. FUJIKUROI
Chemistry and biotransformations in the Scrophulariaceae family 579
GADOLINIUM
Theories of structural and dynamic properties of ions in discrete solvents. Application to magnetic resonance imaging 1689
GALLATES
Quantitative chemobiology 583
GALVANOSTATIC OXIDATION
Oxidation of chlorophenols on Pt electrode in alkaline solution studied by cyclic voltammetry, galvanostatic electrolysis, and gas chromatography-mass spectrometry 1929
GAPDH ENZYME
Strategies for the isolation and identification of trypanocidal compounds from the Rutales 617
GAS-DIFFUSION ELECTRODE
Electrochemical approaches to alleviation of the problem of carbon dioxide accumulation 1917
GAS CHROMATOGRAPHY
Retention parameters in chromatography. Part A. Hold-up volume concept in column chromatography. Part B. Retention parameters in gas chromatograpy 969*
GATED ORGANIC PHOTOCHROMISM
Organic photochromism 639R
GENERIC
Generic source-based nomenclature for polymers 1511*
GENES
Gains achieved by molecular approaches in the area of lignification 561
GENETIC POLYMORPHISM
Combinatorial chemistry. Facing the challenge of chemical genomics 1487
GIANT VESICLES
Microscopy and optical manipulation of dendrimer-built vesicles 435
GIBBS ENERGY
Use of Legendre transforms in chemical thermodynamics 1349R
GLOBALIZATION OF CHEMICAL EDUCATION
Strategy for globalization of chemical education based on the Internet 1125
GLUTAMATE
Selective detection of neurotransmitters by fluorescence and chemiluminescence imaging 1599
GNTI
Molecular recognition at kappa opioid receptors 1387
GRADIENT HPLC
Gradient HPLC in the determination of drug lipophilicity and acidity 1465
GREEN ANALYTICAL METHOD
Design, synthesis, and application of chelating polymers for separation and determination of trace and toxic metal ions. A green analytical method 181
GREEN CHEMISTRY
Catalysis for green chemistry 103
Centre for Green Chemistry, Monash University, Australia 1251
Chemistry in the 21st century. A central science or a "back office" technical activity? 1229
Emergence of a sustainable business community 1265
Green chemistry and the global water crisis 1237

Catalysis for green chemistry 103
HETEROJUNCTION
Conjugated polymers. New materials for optoelectronic devices 425
HIGH PRESSURE
Phase diagrams at high temperature and high pressure. Determination and consequent developments 771
HIGH SCHOOL CHEMISTRY
Teaching chemistry from a societal perspective 1209
HIGH TEMPERATURE
Phase diagrams at high temperature and high pressure. Determination and consequent developments 771
HIGH-THROUGHPUT SYNTHESIS
New methods for high-throughput synthesis 1103
HISTORICAL BACKGROUND
Use and distribution of organochlorine pesticides. The future in Africa 1147
HISTORY
Twentieth century developments in photochemistry. Brief historical sketches 395
HIV
New developments in anti-HIV chemotherapy 55
HIV CHEMOTHERAPY
Synthesis of nucleoside analogs and new Tat protein inhibitors 1189
HOLD-UP VOLUME
Retention parameters in chromatography. Part A. Hold-up volume concept in column chromatography. Part B. Retention parameters in gas chromatograpy 969*
HOMOGENEOUS CATALYSIS
Applications of "planar-chiral" heterocycles in asymmetric catalysis 1113
Asymmetric catalysis with "planar-chiral" heterocycles 347
Rapid screening and combinatorial methods in homogeneous organometallic catalysis 119
HOMOGENEOUS CATALYSTS
Rare earth metal-based catalysts for the polymerization of nonpolar and polar monomers 351
HOMOPOLYMER
Generic source-based nomenclature for polymers 1511*
HOPPING MODEL
Long-distance charge transport through DNA. An extended hopping model 449
HOST-GUEST STRUCTURES
Nomenclature of structural and compositional characteristics of ordered microporous and mesoporous materials with inorganic hosts 381*
HPLC
Gradient HPLC in the determination of drug lipophilicity and acidity 1465
HUMAN
Continuing evolution of the drug discovery process in the pharmaceutical industry 67
HUMAN EXPOSURE
Human exposure to traffic pollution. Experience from Danish studies 137
HUMAN EXPOSURE ASSESSMENT
Human exposure to outdoor air pollution 933R
HUMAN EXPOSURE TO TRAFFIC AIR POLLUTION
Human exposure to traffic pollution. Experience from Danish studies 137
HUMIC MATTER
Humic matter and contaminants. General aspects and modeling metal ion binding 2005
HUMIC MATTER AND REMEDIATION
Humic matter and contaminants. General aspects and modeling metal ion binding 2005
HUMIC SUBSTANCES
Hydrolyzing metal salts as coagulants 2017
HYDRIDE
Reactions of d^0 alkylidene and amide complexes with silanes 331
HYDRIDO COMPLEXES
Rare earth metal-based catalysts for the polymerization of nonpolar and polar monomers 351
HYDROARYLATION OF ALKYNES
New developments in transition metal-catalyzed synthetic reactions via C–H bond activation 319
HYDRODYNAMIC INTERACTIONS
Subtle order in settling suspensions 1679
HYDROGEN
Names for muonium and hydrogen atoms and their ions 377*
HYDROGEN PEROXIDE
Use of TOF-SIMS for the analysis of surface metals in H_2O_2-bleached lignocellulosic fibers 2047
HYDROGEN PEROXIDE CATALYSIS
Green chemistry. Sustaining a high-technology civilization 113
HYDROLYSIS
Hydrolyzing metal salts as coagulants 2017
HYDROPHOBIC EFFECT
Using simulation to study solvation in water 1721
HYDROPHOBICITY
Gradient HPLC in the determination of drug lipophilicity and acidity 1465
HYDROSILYLATION
Rational design of polymers for optoelectronic interests 243
HYGIENE
Risk assessment for occupational exposure to chemicals. A review of current methodology 993R
HYPOLIPIDEMIC AGENTS
New chemical structures of hypolipidemic and antiplatelet activity 1445
ICE SURFACES AND FILMS
Exploring new opportunities with sum-frequency nonlinear optical spectroscopy 1589
ICPMS
Evolution and revolution in instrumentation for plasma-source mass spectrometry 1579
IDENTIFICATION
Isolation, identification, synthesis, and bioefficacy of female *Diacrisia obliqua* (Arctiidae) sex pheromone blend. An Indian agricultural pest 1157
ILLUDANES
Bracken adaptation mechanisms and xenobiotic chemistry 549
IMAGING
Selective detection of neurotransmitters by fluorescence and chemiluminescence imaging 1599
IMAGING OF TRANSPORT
A glance into the bulk of solvent polymeric pH membranes 17
IMINE
New olefin polymerization and copolymerization catalysts. Effect of coordinating functionalities 251

IMPACT MODIFIERS
Blends containing core-shell impact modifiers. Part 1: Structure and tensile deformation mechanisms 897R
INCLUSION COMPLEX
Crystalline inclusion complexes as media of molecular recognitions and selective reactions 1137
INDIA
Green chemistry in India 1261
INDOLIZIDINES
Efficient stereoselective syntheses of piperidine, pyrrolidine, and indolizidine alkaloids 573
INDUSTRIAL ECOLOGY
Emergence of a sustainable business community 1265
INFRASTRUCTURE
Green chemistry as systems science 1243
INHIBITION
New inhibitors for copper corrosion 1861
INNATE DEFENSES
Improving self-defense in plants. Martial arts for vegetables 1325
INORGANIC HOST STRUCTURES
Nomenclature of structural and compositional characteristics of ordered microporous and mesoporous materials with inorganic hosts 381*
INSECTS
Molecules and macromolecules involved in chemical communication of scarab beetles 613
INTEGRAL EQUATION THEORY
Theories of structural and dynamic properties of ions in discrete solvents. Application to magnetic resonance imaging 1689
INTEGRASE (HIV)
New developments in anti-HIV chemotherapy 55
INTERFERENCES
Selectivity in analytical chemistry 1381*
INTERNAL CHARGE TRANSFER (ICT)
Luminescent sensors and photonic switches 503
INTERNATIONAL CONVENTIONS
Use and distribution of organochlorine pesticides. The future in Africa 1147
INTERNET
Strategy for globalization of chemical education based on the Internet 1125
INTRAMOLECULAR CYCLIZATION
Intramolecular cyclization of propargyl derivatives using environmentally friendly methodologies 1941
ION MOBILITY SPECTROMETRY
JCAMP-DX. A standard format for the exchange of ion mobility spectrometry data 1765*
ION SELECTIVE ELECTRODES (ISES)
Devices for ion-sensing and pX measurements 31
IONIC FLUIDS
Corresponding states for electrolyte solutions 1733
IONIC LIQUIDS
Solvent-free preparation of ionic liquids using a household microwave oven 1309
Using neoteric solvents in oil shale studies 153
IONIC SOLUTIONS
Using simulation to study solvation in water 1721
IONIZATION ENERGIES
Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon) 1521R
IONOPHORES
Extraction and separation of metal cations in solution by supported liquid membrane using lasalocid A as carrier 2039
IRIDIUM HYDROSULFIDO COMPLEX
Chemical nitrogen fixation by using molybdenum and tungsten complexes 261
IRON
Hydrolyzing metal salts as coagulants 2017
ISOCOUMARIN
Natural products from around the world 567
ISOLATION
Isolation, identification, synthesis, and bioefficacy of female *Diacrisia obliqua* (Arctiidae) sex pheromone blend. An Indian agricultural pest 1157
ISOLOBAL DISPLACEMENT
Isolobal displacement methodology for the synthesis of transition-metal cluster complexes containing various biscyclopentadienyl ligands 305
ISOMERIZATION
Green twist to old theme. An ecofriendly approach 199
ISOTHERMAL MICROCALORIMETRY
Standards in isothermal microcalorimetry 1625R
ISOTOPE LABELING
NMR spectroscopy in drug design 1429
ISOTROPIC HYPERFINE COUPLING CONSTANTS
Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon) 1521R
ISSUES-BASED CHEMISTRY
Teaching chemistry from a societal perspective 1209
IUPAC CTC
Strategy for globalization of chemical education based on the Internet 1125
IUPAC–CTC
UNESCO/IUPAC–CTC global program in microchemistry 1215
IUPAC RECOMMENDATIONS, see RECOMMENDATIONS
IUPAC TECHNICAL REPORTS, see RECOMMENDATIONS
JCAMP-DX
Guidelines for the representation of pulse sequences for solution-state nuclear magnetic resonance spectrometry 1749*
JCAMP-DX. A standard format for the exchange of ion mobility spectrometry data 1765*
KAIROMONES
Pheromones and kairomones for contol of pest insects. Some current results from a Swedish research program 607
KATAL
Unit "katal" for catalytic activity 927R
KEROGEN
Using neoteric solvents in oil shale studies 153
KETONES
Asymmetric hydrogenation via architectural and functional molecular engineering 227
Copper complexes for catalytic, aerobic oxidation of hydrocarbons 311
KNOWLEDGE MANAGEMENT
Guidelines for the representation of pulse sequences for solution-state nuclear magnetic resonance spectrometry 1749*
JCAMP-DX. A standard format for the exchange of ion mobility spectrometry data 1765*
KOLBE ELECTROOXIDATION
Biphasic sonoelectrosynthesis. A review 1947
KUKERSITE
Using neoteric solvents in oil shale studies 153
LAB ON CHIP
Miniaturization and chip technology. What can we expect? 1555
LACTATE DEHYDROGENASE
Low-temperature manufacturing of fine pharmaceutical powders with supercritical fluid aerosolization in a Bubble Dryer® 1299
LANOSTEROL 14α-DEMETHYLASE
Rational design and synthesis of homochiral azole antifungal agents 1477
LANTHANACARBORANE
New class of metallacarboranes incorporating the η^7-carboranyl ligand 361
LANTHANIDES
Dissolution and formation of nuclear materials in molten media 799
New class of metallacarboranes incorporating the η^7-carboranyl ligand 361
Novel polymerization and copolymerization of ethylene, styrene, and/or butadiene by new organolanthanide-based catalysts 291
Organometallic pentalene complexes 233
LANTHANOIDOCENES
Lewis-acidic organometallic compounds of the lanthanides and the alkaline earth metals as catalysts for the activation of carbonyl groups 279
LASER-INDUCED FLUORESCENT DETECTION
Capillary electrophoretic techniques toward the metabolome analysis 1563

LEACHING
Recoverable catalysts. Ultimate goals, criteria of evaluation, and the green chemistry interface 1319
LEAD FINDING BY NMR
NMR spectroscopy in drug design 1429
LEAD OPTIMIZATION BY NMR
NMR spectroscopy in drug design 1429
LEGENDRE TRANSFORMS
Use of Legendre transforms in chemical thermodynamics 1349R
LEVELS OF COMPREHENDING CHEMISTRY
Teaching chemistry from a societal perspective 1209
LIBRARY SYNTHESIS
New methods for high-throughput synthesis 1103
LIFE CYCLE ANALYSIS
Integrating green chemistry and sustainability into a specialty chemical company 1269
LIFE CYCLE ASSESSMENT
Sustainability metrics for vehicles 1273
LIFE TIME
A glance into the bulk of solvent polymeric pH membranes 17
LIGANDS
Effect of ligands on divalent palladium-catalyzed carbon–carbon coupling reactions. Highly enantioselective synthesis of optically active γ-butyrolactones 247
Opioid and sigma receptor studies. New developments in the design of selective sigma ligands 1499
Photoactive pyrene-containing receptors for transition-metal ions 411
LIGNIFICATION
Gains achieved by molecular approaches in the area of lignification 561
LIGNINS
Gains achieved by molecular approaches in the area of lignification 561
Use of TOF-SIMS for the analysis of surface metals in H_2O_2-bleached lignocellulosic fibers 2047
LIGNOCELLULOSIC
Use of TOF-SIMS for the analysis of surface metals in H_2O_2-bleached lignocellulosic fibers 2047
LINOLEIC ACID
Photosensitization by drugs 481
LIPIDS
Lexicon of lipid nutrition 685R
Measurement and analysis of results obtained on biological substances with differential scanning calorimetry 745R
LIPOPHILIC COMPLEXES
Speciation dynamics and bioavailability of metals. Exploration of the case of two uptake routes 39
LIPOPHILICITY
Gradient HPLC in the determination of drug lipophilicity and acidity 1465
LIQUID CRYSTALLINE POLYMERS
Lewis-acidic organometallic compounds of the lanthanides and the alkaline earth metals as catalysts for the activation of carbonyl groups 279
LIQUID CRYSTALS
Definitions of basic terms relating to low-molar-mass and polymer liquid crystals 845*
LIQUID STRUCTURE
Theories of structural and dynamic properties of ions in discrete solvents. Application to magnetic resonance imaging 1689
LIQUID SURFACES
Exploring new opportunities with sum-frequency nonlinear optical spectroscopy 1589
LIQUID CHROMATOGRAPHY
Retention parameters in chromatography. Part A. Hold-up volume concept in column chromatography. Part B. Retention parameters in gas chromatograpy 969*
LIQUID-CRYSTALLINE STATE
Definitions of basic terms relating to low-molar-mass and polymer liquid crystals 845*
LIQUID PHASE
Polymer-metal complexes for environmental protection. Chemoremediation in the aqueous homogeneous phase 129
LITHIUM
Chemistry of 1,2-allenyl/propargyl metal species. A personal account 337
LITHOGRAPHY
Developments in CO_2 research 1281
LOG P
Gradient HPLC in the determination of drug lipophilicity and acidity 1465
LOG k_W
Gradient HPLC in the determination of drug lipophilicity and acidity 1465
LUMINESCENCE
Luminescent sensors and photonic switches 503
Selective detection of neurotransmitters by fluorescence and chemiluminescence imaging 1599
LUMINESCENCE SIGNALING
Molecular design of luminescent metal-based materials 543
LYSOZYME
Low-temperature manufacturing of fine pharmaceutical powders with supercritical fluid aerosolization in a Bubble Dryer® 1299
M. PLUMBEUS
Chemistry and biotransformations in the Scrophulariaceae family 579
MACROCYCLES
Calixphyrins. Hybrid macrocycles at the structural crossroads between porphyrins and calixpyrroles 1041
MAGNETIC RESONANCE IMAGING
Theories of structural and dynamic properties of ions in discrete solvents. Application to magnetic resonance imaging 1689
MALARIA
From classical antimalarial drugs to new compounds based on the mechanism of action of artemisinin 1173
MANGANESE
New methods for the synthesis of transition-metal fullerene complexes 287
MANIPULATION OF CHEMICAL REACTIONS
Coherent control for ultrafast photochemical reactions 525
MANZAMINE
Bioactive compounds from coral reef invertebrates 589
MARINE SPONGE
Bioactive compounds from coral reef invertebrates 589
MARKER LIBRARIES
Combinatorial chemistry. Facing the challenge of chemical genomics 1487
MATRIX EFFECTS
Detecting and circumventing sources of inaccuracy in flow analysis 45
MECHANISM
Organometallic chemistry. Past, present, and future 205
MECHANISM OF ACTION
Antitumor acridines with diaminoalkylo pharmacophoric group 1421
MECHANISMS OF TOUGHENING
Blends containing core-shell impact modifiers. Part 1: Structure and tensile deformation mechanisms 897R
MECHANISTIC MODEL
Asymmetric hydrogenation via architectural and functional molecular engineering 227
MECHANISTIC PATHWAYS
Organometallic chemistry at the threshold of a new millennium. Retrospect and prospect 209
MEDICINAL CHEMISTRY
Chemical development of the vasopressin receptor 2 antagonist SR-121463 1401
MEDICINES
Quantitative chemobiology 583
MELOLONTHINAE
Molecules and macromolecules involved in chemical communication of scarab beetles 613
MELT RHEOLOGY
Blends containing core-shell impact modifiers. Part 2: Melt rheology of rubber-toughened plastics 913R
MELTING ZONE
Phase diagrams at high temperature and high pressure. Determination and consequent developments 771
MEMBRANE DESIGN
Electrochemical technology for environmental treatment and clean energy conversion 1819

MENTHA
Supercritical fluid extraction of Z-sabinene hydrate-rich essential oils from Romanian mentha hybrids 1287
MESOGEN
Definitions of basic terms relating to low-molar-mass and polymer liquid crystals 845*
MESOMORPHIC
Definitions of basic terms relating to low-molar-mass and polymer liquid crystals 845*
MESOPHASE
Definitions of basic terms relating to low-molar-mass and polymer liquid crystals 845*
MESOPOROUS MATERIALS
Nomenclature of structural and compositional characteristics of ordered microporous and mesoporous materials with inorganic hosts 381*
MESOPOROUS TiO_2 FILMS
Molecular photovoltaics mimic photosynthesis 459
METABOLIC ENGINEERING
Gains achieved by molecular approaches in the area of lignification 561
METABOLIC PATHWAY
Gains achieved by molecular approaches in the area of lignification 561
METABOLOME
Capillary electrophoretic techniques toward the metabolome analysis 1563
METAL COMPLEX
Chemistry of η5-fullerene metal complexes 355
Electrochemical approaches to alleviation of the problem of carbon dioxide accumulation 1917
Photophysics of π-conjugated metal-organic oligomers 497
Polymer-metal complexes for environmental protection. Chemoremediation in the aqueous homogeneous phase 129
METAL ELECTRODE
Electrochemical approaches to alleviation of the problem of carbon dioxide accumulation 1917
METAL ION
Polymer-metal complexes for environmental protection. Chemoremediation in the aqueous homogeneous phase 129
METAL ION BINDING TO HUMICS
Humic matter and contaminants. General aspects and modeling metal ion binding 2005
METAL-BASED MATERIALS
Molecular design of luminescent metal-based materials 543
METALLACARBORNE
New class of metallacarboranes incorporating the η^7-carboranyl ligand 361
METALLOCENE CATALYSTS
Novel polymerization and copolymerization of ethylene, styrene, and/or butadiene by new organolanthanide-based catalysts 291
METALLOCENES
New metallocenes of early transition metals with functional groups in organic ligands. Red-ox transformations 367
METAL–METAL MULTIPLE BONDS
Unsaturated binuclear homoletpic metal carbonyls $M_2(CO)_x$ (M = Fe, Co, Ni; x = 5, 6, 7, 8). Are multiple bonds between transition metals possible for these molecules? 1059
METALS
Effect of lignin content and magnesium-to-manganese ratio on the selectivity of oxygen delignification in softwood kraft pulp 2059
In situ speciation measurements. Using diffusive gradients in thin-films (DGT) to determine inorganically and organically complexed metals 9
Speciation dynamics and bioavailability of metals. Exploration of the case of two uptake routes 39
METAL-TO-LIGAND CHARGE TRANSFER (MLCT)
Photophysics of π-conjugated metal-organic oligomers 497
METHYL SALICYLATE
Pheromones and kairomones for contol of pest insects. Some current results from a Swedish research program 607
METHYLATION REACTIONS
New developments in dimethyl carbonate chemistry 1117
MICELLAR ELECTROKINETIC CHROMATOGRAPHY
Capillary electrophoretic techniques toward the metabolome analysis 1563
MICHAEL-ALDOL CONDENSATION
Studies directed toward the preparation of key intermediates for the synthesis of trisporic acids and cassiol 623
MICRO TAS
Miniaturization and chip technology. What can we expect? 1555
MICRO TOTAL ANALYTICAL SYSTEM (TAS)
Miniaturization and chip technology. What can we expect? 1555
MICROCHEMISTRY
UNESCO/IUPAC–CTC global program in microchemistry 1215
MICROELECTRONICS METALLIZATION
Reactions of d^0 alkylidene and amide complexes with silanes 331
MICROEMULSIONS
Green synthesis via electrolysis in microemulsions 1895
Status of organochlorine (DDT) pollutants and steps toward electrocatalytic reductions 1907
MICROENCAPSULATED CATALYST
New methods for high-throughput synthesis 1103
MICRONIZATION PROCESSES
Supercritical fluids-assisted micronization techniques. Low-impact routes for particle production 1293
MICROPARTICLES
Supercritical fluids-assisted micronization techniques. Low-impact routes for particle production 1293
MICROPOROUS MATERIALS
Nomenclature of structural and compositional characteristics of ordered microporous and mesoporous materials with inorganic hosts 381*
MICROSCOPY
Selective detection of neurotransmitters by fluorescence and chemiluminescence imaging 1599
MICROSTRUCTURE
Miniaturization and chip technology. What can we expect? 1555
MICROWAVES
Dry media reactions 147
Reactivity and selectivity under microwaves in organic chemistry. Relation with medium effects and reaction mechanisms 161
Solvent-free accelerated organic syntheses using microwaves 193
MICROWAVE IRRADIATION
Green twist to old theme. An ecofriendly approach 199
Solvent-free preparation of ionic liquids using a household microwave oven 1309
MILLIPED
Recent results in the synthesis of ecologically important bioregulators 601
MIXED CRYSTALS
Solid-state solubility and its limits. The alkali halide case 807
MIXED LIGANDS
Novel polymerization and copolymerization of ethylene, styrene, and/or butadiene by new organolanthanide-based catalysts 291
MLCT
Photophysics of π-conjugated metal-organic oligomers 497
MODELING
Modeling lifetime and degradability of organic compounds in air, soil, and water systems 1331R
Treatment of Tunisian salt lakes using solubility phase diagrams 761
MODIFIED ELECTRODES
Molecular and biomolecular optoelectronics 535
MODIFIED PHLOROGLUCINOLS
Natural products from around the world 567
MOLALITY
Molality-based standards of electrolytic conductivity 1783R
MOLE PER SECOND
Unit "katal" for catalytic activity 927R
MOLECULAR ARITHMETIC
Luminescent sensors and photonic switches 503
MOLECULAR CHIRALITY
Exploring new opportunities with sum-frequency nonlinear optical spectroscopy 1589
MOLECULAR DOCKING
Rational design and synthesis of homochiral azole antifungal agents 1477

MOLECULAR DYNAMICS OF TRYPTOPHAN
Tryptophan rotamers that report the conformational dynamics of proteins 415
MOLECULAR ELECTRONICS
Molecular and biomolecular optoelectronics 535
MOLECULAR LOGIC
Luminescent sensors and photonic switches 503
MOLECULAR MODELING
New chemical structures of hypolipidemic and antiplatelet activity 1445
MOLECULAR OXYGEN
Nanostructured amorphous metals, alloys, and metal oxides as new catalysts for oxidation 85
MOLECULAR QUANTUM DYNAMICS
Coherent control for ultrafast photochemical reactions 525
MOLECULAR RECOGNITION
Crystalline inclusion complexes as media of molecular recognitions and selective reactions 1137
Theories of structural and dynamic properties of ions in discrete solvents. Application to magnetic resonance imaging 1689
MOLECULAR STRUCTURES
Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon) 1521R
MOLTEN SALTS
Dissolution and formation of nuclear materials in molten media 799
MOLYBDENUM
New methods for the synthesis of transition-metal fullerene complexes 287
MOLYBDENUM DINITROGEN COMPLEX
Chemical nitrogen fixation by using molybdenum and tungsten complexes 261
MONITORING
Risk assessment for occupational exposure to chemicals. A review of current methodology 993R
MONOLAYERS
Molecular and biomolecular optoelectronics 535
MONOMETHYLATION SELECTIVITY
New developments in dimethyl carbonate chemistry 1117
MR200
Opioid and sigma receptor studies. New developments in the design of selective sigma ligands 1499
MULTICOMMUTATION
Detecting and circumventing sources of inaccuracy in flow analysis 45
MULTIDRUG RESISTANCE
New small-molecule tubulin inhibitors 1459
MULTIMETALLIC ACTIVATION
Alkane activation on a multimetallic site 315
MUON
Names for muonium and hydrogen atoms and their ions 377*
MUONIUM
Names for muonium and hydrogen atoms and their ions 377*
MYOGLOBIN
Protein dynamics detected by the time-resolved transient grating technique 513
NANOCRYSTALLINE OXIDES
Molecular photovoltaics mimic photosynthesis 459
NANOPARTICLES
Direct electrochemistry of nanoparticulate Fe_2O_3 in aqueous solution and adsorbed onto tin-doped indium oxide 1885
Molecular and biomolecular optoelectronics 535
Supercritical fluids-assisted micronization techniques. Low-impact routes for particle production 1293
NANOPOROUS CATALYSTS
Benign by design. New catalysts for an environmentally conscious age 1087
NANOSPACE CHEMISTRY
Ultrafast dynamics at solid/liquid interfaces as investigated by photothermal spectroscopy 1613
NANOSTRUCTURED AMORPHOUS METALS AND ALLOYS
Nanostructured amorphous metals, alloys, and metal oxides as new catalysts for oxidation 85
NAPHTHALENE DIIMIDE
Threading intercalation to double-stranded DNA and the application to DNA sensing. Electrochemical array technique 1573
NATURAL PRODUCT TOTAL SYNTHESIS
Integrating natural product synthesis and combinatorial chemistry 1033
NATURAL PRODUCTS
Biodiversity conservation and drug discovery in Suriname. Explorations in nature's combinatorial library 595
Efficient stereoselective syntheses of piperidine, pyrrolidine, and indolizidine alkaloids 573
New small-molecule tubulin inhibitors 1459
Studies directed toward the preparation of key intermediates for the synthesis of trisporic acids and cassiol 623
NEAR-FIELD SCANNING OPTICAL MICROSCOPY (NSOM)
Looking at the photodynamics of individual fluorescent molecules and proteins 431
NEMATIC
Definitions of basic terms relating to low-molar-mass and polymer liquid crystals 845*
NEOTROPICS
Bracken adaptation mechanisms and xenobiotic chemistry 549
NETWORK
Generic source-based nomenclature for polymers 1511*
NEUTRON SCATTERING
Theories of structural and dynamic properties of ions in discrete solvents. Application to magnetic resonance imaging 1689
NICA MODEL
Humic matter and contaminants. General aspects and modeling metal ion binding 2005
NICA-DONNAN MODEL
Humic matter and contaminants. General aspects and modeling metal ion binding 2005
NICKEL
Rational design of polymers for optoelectronic interests 243
NITRIDE
Dissolution and formation of nuclear materials in molten media 799
NITROGEN DIOXIDE
Chalcogenide-based chemical sensors for atmospheric pollution control 2001
NITROGEN FIXATION
Chemical nitrogen fixation by using molybdenum and tungsten complexes 261
NMR
NMR spectroscopy in drug design 1429
NMR CHEMICAL SHIFTS
Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon) 1521R
NMR RELAXATION
Theories of structural and dynamic properties of ions in discrete solvents. Application to magnetic resonance imaging 1689
NOBLE GAS
Organometallic alkane and noble-gas complexes in conventional and supercritical fluids 443
NONADIABATIC COUPLINGS
Coherent control for ultrafast photochemical reactions 525
NONAQUEOUS SOLVENTS
Corresponding states for electrolyte solutions 1733
NON-KEKULE STRUCTURE
Quinone methide intermediates in organic photochemistry 529
NONLINEAR OPTICAL POLYMERS
Rational design of polymers for optoelectronic interests 243
NONLINEAR OPTICS
Exploring new opportunities with sum-frequency nonlinear optical spectroscopy 1589
NONSTEROIDAL ANTIINFLAMMATORY DRUGS
Photosensitization by drugs 481
NONTERRESTRIAL ISOTOPIC ABUNDANCES
Atomic weights of the elements 1999 667R
NONTHERMAL EFFECTS
Reactivity and selectivity under microwaves in organic chemistry. Relation with medium effects and reaction mechanisms 161
NONTHERMALIZED ELECTRON
Ultrafast dynamics at solid/liquid interfaces as investigated by photothermal spectroscopy 1613

NUCLEAR MAGNETIC RESONANCE (NMR)
NMR nomenclature. Nuclear spin properties and conventions for chemical shifts 1795*
NMR spectroscopy in drug design 1429
NUCLEAR MAGNETIC RESONANCE SPECTROMETRY
Guidelines for the representation of pulse sequences for solution-state nuclear magnetic resonance spectrometry 1749*
NUCLEAR MATERIALS
Dissolution and formation of nuclear materials in molten media 799
NUCLEAR SPIN PROPERTIES
NMR nomenclature. Nuclear spin properties and conventions for chemical shifts 1795*
NUCLEIC ACIDS
Photosensitization by drugs 481
NUCLEOBASE ANALOGS
Synthesis of nucleoside analogs and new Tat protein inhibitors 1189
NUCLEOPHILIC CATALYSIS
Applications of "planar-chiral" heterocycles in asymmetric catalysis 1113
Asymmetric catalysis with "planar-chiral" heterocycles 347
NUCLEOSIDE ANALOGS
Synthesis of nucleoside analogs and new Tat protein inhibitors 1189
NUCLEOSIDES
Applications of green chemistry in the manufacture of oligonucleotide drugs 175
NUCLIDES
Errata: Spontaneous fission half-lives for ground-state nuclides. IUPAC Technical Report, Pure Appl. Chem. 72, 1525-1562 (2000) 1225R
NYLON 6.6
New developments in dimethyl carbonate chemistry 1117
O(^{1}D) QUANTUM YIELDS
Important photochemical processes in the atmosphere 487
OCEANIC SALTS
Solubility equilibria in multicomponent oceanic salt systems from t = 0 °C to 200 °C. Model parameterization and databases 831
OIL SHALE
Using neoteric solvents in oil shale studies 153
OLEFIN
New olefin polymerization and copolymerization catalysts. Effect of coordinating functionalities 251
OLIGONUCLEOTIDES
Applications of green chemistry in the manufacture of oligonucleotide drugs 175
ONE-SITE ADDITON TWO-METAL OXIDATIONS
Cooperative bimetallic oxidative addition reactions 221
ONLINE DATABASES
Reliable solubility data in the age of computerized chemistry. Why, how, and when? 825
ONLINE SAMPLE PRECONCENTRATION
Capillary electrophoretic techniques toward the metabolome analysis 1563
OPIOID RECEPTORS
Molecular recognition at kappa opioid receptors 1387
OPIOIDS
Opioid and sigma receptor studies. New developments in the design of selective sigma ligands 1499
OPTICAL TRAPPING
Microscopy and optical manipulation of dendrimer-built vesicles 435
OPTICAL TRIGGER
Protein dynamics detected by the time-resolved transient grating technique 513
OPTICALLY ACTIVE
Effect of ligands on divalent palladium-catalyzed carbon–carbon coupling reactions. Highly enantioselective synthesis of optically active γ-butyrolactones 247
OPTICALLY ACTIVE PHOSPHINES
New P-chirogenic diphosphines and their use in catalytic asymmetric reactions 373
OPTOBIOELECTRONICS
Molecular and biomolecular optoelectronics 535
ORGANIC PHOTOCHROMISM
Organic photochromism 639R
ORGANIC SYNTHESES
Green electrochemistry. Examples and challenges 1305
Organometallic chemistry. Past, present, and future 205
Solvent-free accelerated organic syntheses using microwaves 193
ORGANOACTINIDE
New class of metallacarboranes incorporating the η^7-carboranyl ligand 361
ORGANOCOPPER REAGENT
Chemistry of n5-fullerene metal complexes 355
ORGANOHALIDE
Direct electrochemistry of redox proteins or enzymes at various film electrodes and their applications in monitoring some pollutants 1979
ORGANOLANTHANIDE
New class of metallacarboranes incorporating the η^7-carboranyl ligand 361
ORGANOMETALLIC
Organometallic alkane and noble-gas complexes in conventional and supercritical fluids 443
Organometallic pentalene complexes 233
ORGANOMETALLIC CHEMISTRY
New methods for the synthesis of transition-metal fullerene complexes 287
Organometallic chemistry. Past, present, and future 205
Rapid screening and combinatorial methods in homogeneous organometallic catalysis 119
Unsaturated binuclear homoletpic metal carbonyls $M_2(CO)_x$ (M = Fe, Co, Ni; x = 5, 6, 7, 8). Are multiple bonds between transition metals possible for these molecules? 1059
OVALBUMIN
Low-temperature manufacturing of fine pharmaceutical powders with supercritical fluid aerosolization in a Bubble Dryer® 1299
OXIDASES
Development of bioreactors for application of biocatalysts in biotransformations and bioremediation 77
OXIDATION
Modeling lifetime and degradability of organic compounds in air, soil, and water systems 1331R
Solvent-free accelerated organic syntheses using microwaves 193
OXIDE
Dissolution and formation of nuclear materials in molten media 799
OXYGEN DELIGNIFICATION
Effect of lignin content and magnesium-to-manganese ratio on the selectivity of oxygen delignification in softwood kraft pulp 2059
OXYGEN HETEROCYCLES
Synthesis of oxygen heterocycles via alkynyltungsten compounds 265
OZONE PHOTOLYSIS
Important photochemical processes in the atmosphere 487
OZONE PRODUCTION
Green processes for environmental application. Electrochemical ozone production 1871
PACHASTRISAMINE
Bioactive compounds from coral reef invertebrates 589
PAINT SLUDGE
Integrated emissions management for automotive painting operations 1277
PAINTING
Integrated emissions management for automotive painting operations 1277
PALLADIUM
Chemistry of 1,2-allenyl/propargyl metal species. A personal account 337
Effect of ligands on divalent palladium-catalyzed carbon–carbon coupling reactions. Highly enantioselective synthesis of optically active γ-butyrolactones 247
New olefin polymerization and copolymerization catalysts. Effect of coordinating functionalities 251
PALLADIUM ACETATE
New developments in transition metal-catalyzed synthetic reactions via C–H bond activation 319
PALLADIUM CATALYSIS
Interplay of synthesis and mechanism in asymmetric homogeneous catalysis 343
PALLADIUM COMPLEXES
Fullerenes covalently linked to transition metals with organic ligands 275

PAPER
Use of TOF-SIMS for the analysis of surface metals in H_2O_2-bleached lignocellulosic fibers 2047
PARADISONE
Recent advances in asymmetric catalysis. Synthetic applications to biologically active compounds 299
PARA-HYDROGEN NMR
Interplay of synthesis and mechanism in asymmetric homogeneous catalysis 343
PARKINSON'S DISEASES
Bioactive natural products as a potential source of new pharmacophores. A theory of memory 555
PD–PD BOND
Novel coordination behavior of unsaturated hydrocarbon ligands on Pd–Pd bonds 295
PENTALENE
Organometallic pentalene complexes 233
PERFORMANCE ASSESSMENT
Effect of colloids on radionuclide migration for performance assessment of HLW disposal in Japan 2027
PERIODIC TABLE
NMR nomenclature. Nuclear spin properties and conventions for chemical shifts 1795*
PEROXIDE
From classical antimalarial drugs to new compounds based on the mechanism of action of artemisinin 1173
PEROXOMETALS
Peroxo metal-mediated environmentally favorable route to brominating agents and protocols for bromination of organics 93
PERSISTENCE
Modeling lifetime and degradability of organic compounds in air, soil, and water systems 1331R
PERSISTENT CHEMICALS
Modeling lifetime and degradability of organic compounds in air, soil, and water systems 1331R
PERSISTENT ORGANIC POLLUTANTS
Implementing green chemistry. An environmental policy for sustainability 1231
PH MEMBRANES
A glance into the bulk of solvent polymeric pH membranes 17
PHARMACEUTICAL POWDERS
Low-temperature manufacturing of fine pharmaceutical powders with supercritical fluid aerosolization in a Bubble Dryer® 1299
PHARMACOLOGICAL ACTIVITY
New chemical structures of hypolipidemic and antiplatelet activity 1445
PHASE BEHAVIOR OF COLLOIDS
Charge-stabilized colloidal suspensions. Phase behavior and effects of confinement 1705
PHASE DIAGRAMS
Phase diagrams at high temperature and high pressure. Determination and consequent developments 771
Solid-state solubility and its limits. The alkali halide case 807
PHASE-TRANSFER CATALYSIS
New developments in dimethyl carbonate chemistry 1117
Reactivity and selectivity under microwaves in organic chemistry. Relation with medium effects and reaction mechanisms 161
PHENOL
New polymeric photosensitizers 491
PHENOLICS
Bracken adaptation mechanisms and xenobiotic chemistry 549
Development of a new amperometric biosensor based on polyphenoloxidase and polyethersulphone membrane 1993
PHEROMONES
Molecules and macromolecules involved in chemical communication of scarab beetles 613
Pheromones and kairomones for contol of pest insects. Some current results from a Swedish research program 607
Recent results in the synthesis of ecologically important bioregulators 601
PHOSPHONATES
Critical evaluation of stability constants of phosphonic acids 1641R
PHOSPHONIC ACIDS
Critical evaluation of stability constants of phosphonic acids 1641R
PHOSPHORUS
New metallocenes of early transition metals with functional groups in organic ligands. Red-ox transformations 367
PHOTOACTIVE YELLOW PROTEIN
Protein dynamics detected by the time-resolved transient grating technique 513
PHOTOALLERGY
Photosensitization by drugs 481
PHOTOCATALYSIS
Photocatalytic transformation of organic compounds in the presence of inorganic ions 1839
PHOTOCHEMICAL DEGRADATION
Figures-of-merit for the technical development and application of advanced oxidation technologies for both electric- and solar-driven systems 627R
PHOTOCHEMISTRY
Organometallic alkane and noble-gas complexes in conventional and supercritical fluids 443
Twentieth century developments in photochemistry. Brief historical sketches 395
PHOTOCHROMNIC COMPOUNDS
Molecular and biomolecular optoelectronics 535
PHOTODISSOCIATION RATES
Important photochemical processes in the atmosphere 487
PHOTOELECTROCHEMISTRY
Molecular and biomolecular optoelectronics 535
PHOTOGENOTOXICITY
Photosensitization by drugs 481
PHOTOGRAPHY
New approach to silver halide photography using radical cation chemistry 455
PHOTOINDUCED ELECTRON TRANSFER (PET)
Electron-transfer dyads suitable for novel self-assembled light-harvesting antenna/electron-transfer devices 469
Luminescent sensors and photonic switches 503
Singlet and triplet energy splitting in the radical ion pairs generated by photoinduced electron-transfer reactions 519
PHOTOINDUCED PROCESS
Charge separation and energy transfer in multicomponent porphyrinic arrays 421
PHOTOISOMERIZATION
Microscopy and optical manipulation of dendrimer-built vesicles 435
PHOTOLUMINESCENCE
Rational design of polymers for optoelectronic interests 243
PHOTOOXIDATION
New polymeric photosensitizers 491
PHOTOPHYSICS
Photophysics of π-conjugated metal-organic oligomers 497
PHOTOSWITCH
Organic photochromism 639R
PHOTOSYNTHESIS
Twentieth century developments in photochemistry. Brief historical sketches 395
PHOTOTOXICITY
Photosensitization by drugs 481
PHOTOVOLTAIC
Conjugated polymers. New materials for optoelectronic devices 425
PHYLLOPERTHA
Molecules and macromolecules involved in chemical communication of scarab beetles 613
PHYTOL
Some newer aspects of organozirconium chemistry of relevance to organic synthesis. Zr-Catalyzed enantioselective carbometallation 239
PHYTOREMEDIATION
Bioremediation. An overview 1163
π BOND
Organometallic chemistry. Past, present, and future 205
π-CONJUGATED OLIGOMERS
Photophysics of π-conjugated metal-organic oligomers 497
PIMARANES
Chemistry and biotransformations in the Scrophulariaceae family 579
PINACOL COUPLING
Asymmetric synthesis by stereocontrol 283

PINE SAWFLY
Recent results in the synthesis of ecologically important bioregulators 601
PINE SCALE
Recent results in the synthesis of ecologically important bioregulators 601
PIPERIDINES
Efficient stereoselective syntheses of piperidine, pyrrolidine, and indolizidine alkaloids 573
PITZER MODEL
Solubility equilibria in multicomponent oceanic salt systems from t = 0 °C to 200 °C. Model parameterization and databases 831
PKA
Gradient HPLC in the determination of drug lipophilicity and acidity 1465
PLANAR-CHIRAL
Applications of "planar-chiral" heterocycles in asymmetric catalysis 1113
Asymmetric catalysis with "planar-chiral" heterocycles 347
PLANT EPICUTICULAR WAXES
Improving self-defense in plants. Martial arts for vegetables 1325
PLASMA SOURCE MASS SPECTROMETRY
Evolution and revolution in instrumentation for plasma-source mass spectrometry 1579
PLATINUM
Quasi-nature catalysis. Rhodium-catalyzed C–C bond formation in air and water 1315
PLUTONIUM
Dissolution and formation of nuclear materials in molten media 799
PM2.5
Human exposure to traffic pollution. Experience from Danish studies 137
POISSON–BOLTZMANN EQUATION
Charge-stabilized colloidal suspensions. Phase behavior and effects of confinement 1705
POLAR MONOMER
New olefin polymerization and copolymerization catalysts. Effect of coordinating functionalities 251
POLAR TRANSITION STATES
Reactivity and selectivity under microwaves in organic chemistry. Relation with medium effects and reaction mechanisms 161
POLLUTION CONTROL
Implementing green chemistry. An environmental policy for sustainability 1231
POLLUTION MONITORING
Affinity electrochemical biosensors for pollution control 23
POLLUTION PREVENTION
Solvent-free accelerated organic syntheses using microwaves 193
Solvent-free preparation of ionic liquids using a household microwave oven 1309
POLY(METHYL METHACRYLATE) - TOUGHENED
Blends containing core-shell impact modifiers. Part 1: Structure and tensile deformation mechanisms 897R
Blends containing core-shell impact modifiers. Part 2: Melt rheology of rubber-toughened plastics 913R
POLY(STYRENE-CO-ACRYLONITRILE) - TOUGHENED
Blends containing core-shell impact modifiers. Part 1: Structure and tensile deformation mechanisms 897R
Blends containing core-shell impact modifiers. Part 2: Melt rheology of rubber-toughened plastics 913R
POLY[N-ISOPROPYLACRYLAMIDE-CO-VINYLBENZYLCHLORIDE]
New polymeric photosensitizers 491
POLYCARBONATE - TOUGHENED
Blends containing core-shell impact modifiers. Part 1: Structure and tensile deformation mechanisms 897R
Blends containing core-shell impact modifiers. Part 2: Melt rheology of rubber-toughened plastics 913R
POLYETHERSULPHONE MEMBRANE
Development of a new amperometric biosensor based on polyphenoloxidase and polyethersulphone membrane 1993
POLYHYDRIDO COMPLEX
Alkane activation on a multimetallic site 315
POLYKETIDES
Biodiversity conservation and drug discovery in Suriname. Explorations in nature's combinatorial library 595
POLYMER LIQUID-CRYSTAL
Definitions of basic terms relating to low-molar-mass and polymer liquid crystals 845*
POLYMER REAGENT
Polymer-metal complexes for environmental protection. Chemoremediation in the aqueous homogeneous phase 129
POLYMER SURFACES
Exploring new opportunities with sum-frequency nonlinear optical spectroscopy 1589
POLYMERIC PHOTOSENSITIZERS
New polymeric photosensitizers 491
POLYMERIZATION
Lewis-acidic organometallic compounds of the lanthanides and the alkaline earth metals as catalysts for the activation of carbonyl groups 279
New olefin polymerization and copolymerization catalysts. Effect of coordinating functionalities 251
Organometallic chemistry. Past, present, and future 205
POLYMERIZATION CATALYSTS
Rare earth metal-based catalysts for the polymerization of nonpolar and polar monomers 351
POLYMERIZATIONS
Developments in CO_2 research 1281
POLYMETHACRYLATES
Lewis-acidic organometallic compounds of the lanthanides and the alkaline earth metals as catalysts for the activation of carbonyl groups 279
POLYMORPHISM
Combinatorial chemistry. Facing the challenge of chemical genomics 1487
POLYNUCLEAR METAL COMPLEXES
Molecular design of luminescent metal-based materials 543
POLYOL HOST COMPOUND
Crystalline inclusion complexes as media of molecular recognitions and selective reactions 1137
POLYOLEFINS
Rare earth metal-based catalysts for the polymerization of nonpolar and polar monomers 351
POLYPHAGOUS PEST
Isolation, identification, synthesis, and bioefficacy of female *Diacrisia obliqua* (Arctiidae) sex pheromone blend. An Indian agricultural pest 1157
POLYPHENOL OXIDASE
Development of a new amperometric biosensor based on polyphenoloxidase and polyethersulphone membrane 1993
Development of bioreactors for application of biocatalysts in biotransformations and bioremediation 77
PORCINE PANCREATIC LIPASE
Selective biotransformation reactions on (±) aryl alkyl ketones, (±) benzoxazines, and D-arabino- and D-threo-hydroxyalkyltriazoles 167
PORPHYRIN ANALOGS
Calixphyrins. Hybrid macrocycles at the structural crossroads between porphyrins and calixpyrroles 1041
PORPHYRINS
Calixphyrins. Hybrid macrocycles at the structural crossroads between porphyrins and calixpyrroles 1041
Charge separation and energy transfer in multicomponent porphyrinic arrays 421
POSTGRADUATE
Teaching green chemistry. Third-year-level module and beyond 1257
POTASSIUM CHLORIDE
Molality-based standards of electrolytic conductivity 1783R
PRECAUTIONARY PRINCIPLE
Implementing green chemistry. An environmental policy for sustainability 1231
PRESIDENTIAL CHALLENGE AWARDS IN GREEN CHEMISTRY
Greening the curriculum. American Chemical Society education programs 1247
PRESSURE EFFECT
Vital role of entropy in photochirogenesis 475
PRIMARY STANDARDS
Molality-based standards of electrolytic conductivity 1783R

PROCESS
Continuing evolution of the drug discovery process in the pharmaceutical industry 67
PROCESS CHEMISTRY
Chemical development of the vasopressin receptor 2 antagonist SR-121463 1401
PROCESS RESEARCH
Chemical development of the vasopressin receptor 2 antagonist SR-121463 1401
PROPARGYL DERIVATIVES
Intramolecular cyclization of propargyl derivatives using environmentally friendly methodologies 1941
PROPARGYL METAL
Chemistry of 1,2-allenyl/propargyl metal species. A personal account 337
PROTEASE (HIV)
New developments in anti-HIV chemotherapy 55
PROTEIN DYNAMICS
Protein dynamics detected by the time-resolved transient grating technique 513
PROTEIN-LIGAND INTERACTIONS
NMR spectroscopy in drug design 1429
PROTEINS
Direct electrochemistry of redox proteins or enzymes at various film electrodes and their applications in monitoring some pollutants 1979
Measurement and analysis of results obtained on biological substances with differential scanning calorimetry 745R
Photosensitization by drugs 481
PROTIUM
Names for muonium and hydrogen atoms and their ions 377*
PROTON BINDING TO HUMICS
Humic matter and contaminants. General aspects and modeling metal ion binding 2005
PSEUDORECEPTOR GENERATION
Rational design and synthesis of homochiral azole antifungal agents 1477
PT ELECTRODE
Oxidation of chlorophenols on Pt electrode in alkaline solution studied by cyclic voltammetry, galvanostatic electrolysis, and gas chromatography-mass spectrometry 1929
PTERIDIUM AQUILINUM
Bracken adaptation mechanisms and xenobiotic chemistry 549
PULP INDUSTRY
Gains achieved by molecular approaches in the area of lignification 561
PULP VISCOSITY
Effect of lignin content and magnesium-to-manganese ratio on the selectivity of oxygen delignification in softwood kraft pulp 2059
PULSE SEQUENCES
Guidelines for the representation of pulse sequences for solution-state nuclear magnetic resonance spectrometry 1749*
PVC MEMBRANE ISES
Devices for ion-sensing and pX measurements 31
PX MEASUREMENTS
Devices for ion-sensing and pX measurements 31
PYRENE
Photoactive pyrene-containing receptors for transition-metal ions 411
PYRIDINE DERIVATIVE
Selective preparation of benzene derivatives from three different alkynes and pyridine derivatives from two different alkynes and a nitrile 271
PYROLYSIS
Integrated emissions management for automotive painting operations 1277
PYRROLES
Chemical nitrogen fixation by using molybdenum and tungsten complexes 261
PYRROLIDINES
Efficient stereoselective syntheses of piperidine, pyrrolidine, and indolizidine alkaloids 573
QSAR
Modeling lifetime and degradability of organic compounds in air, soil, and water systems 1331R
QUADRUPOLE MOMENTS
NMR nomenclature. Nuclear spin properties and conventions for chemical shifts 1795*
QUANTUM CHEMISTRY
Unsaturated binuclear homoletpic metal carbonyls $M_2(CO)_x$ (M = Fe, Co, Ni; x = 5, 6, 7, 8). Are multiple bonds between transition metals possible for these molecules? 1059
QUANTUM YIELD
New polymeric photosensitizers 491
QUARTZ CRYSTAL MICROBALANCE
New inhibitors for copper corrosion 1861
QUASI-NATURE
Quasi-nature catalysis. Rhodium-catalyzed C–C bond formation in air and water 1315
QUINOLINE
From classical antimalarial drugs to new compounds based on the mechanism of action of artemisinin 1173
QUINONE METHIDE
Quinone methide intermediates in organic photochemistry 529
QUINONES
Recent results from natural product research at the University of Botswana 1197
RACEMIC CATALYSIS
Racemic catalysis through asymmetric activation 255
RADICAL CATION
New approach to silver halide photography using radical cation chemistry 455
RADICAL CYCLIZATION
Intramolecular cyclization of propargyl derivatives using environmentally friendly methodologies 1941
RADICAL ION PAIRS
Singlet and triplet energy splitting in the radical ion pairs generated by photoinduced electron-transfer reactions 519
RADIOACTIVE WASTE DISPOSAL
Effect of colloids on radionuclide migration for performance assessment of HLW disposal in Japan 2027
RADIOISOTOPE
Status of organochlorine (DDT) pollutants and steps toward electrocatalytic reductions 1907
RADIONUCLIDE MIGRATION
Effect of colloids on radionuclide migration for performance assessment of HLW disposal in Japan 2027
RAMAN SPECTROSCOPY
Phase diagrams at high temperature and high pressure. Determination and consequent developments 771
RAPID SCREENING
Rapid screening and combinatorial methods in homogeneous organometallic catalysis 119
RARE EARTH
New class of metallacarboranes incorporating the η^7-carboranyl ligand 361
RARE EARTH METAL
Rare earth metal-based catalysts for the polymerization of nonpolar and polar monomers 351
REACTION CENTER MODELS
Electron-transfer dyads suitable for novel self-assembled light-harvesting antenna/electron-transfer devices 469
REACTOR DESIGN
Electrochemical technology for environmental treatment and clean energy conversion 1819
RECEPTIVITIES
NMR nomenclature. Nuclear spin properties and conventions for chemical shifts 1795*
RECEPTOR ACTIVATION
Molecular recognition at kappa opioid receptors 1387
RECEPTORS
Opioid and sigma receptor studies. New developments in the design of selective sigma ligands 1499
RECOMMENDATIONS AND REPORTS (R = IUPAC TECHNICAL REPORT AND * = IUPAC RECOMMENDATIONS)
Atomic weights of the elements 1999 667–683R
Blends containing core-shell impact modifiers. Part 1: Structure and tensile deformation mechanisms 897–912R

Blends containing core-shell impact modifiers. Part 2: Melt rheology of rubber-toughened plastics 913–926R
Critical evaluation of stability constants of phosphonic acids 1641–1677R
Definitions of basic terms relating to low-molar-mass and polymer liquid crystals 845–895*
Figures-of-merit for the technical development and application of advanced oxidation technologies for both electric- and solar-driven systems 627–637R
Generic source-based nomenclature for polymers 1511–1519*
Guidelines for the representation of pulse sequences for solution-state nuclear magnetic resonance spectrometry 1749–1764*
Human exposure to outdoor air pollution 933–958R
JCAMP-DX. A standard format for the exchange of ion mobility spectrometry data 1765–1782*
Lexicon of lipid nutrition 685–744R
Measurement and analysis of results obtained on biological substances with differential scanning calorimetry 745–759R
Modeling lifetime and degradability of organic compounds in air, soil, and water systems 1331–1348R
Molality-based standards of electrolytic conductivity 1783–1793R
Names for muonium and hydrogen atoms and their ions 377–380*
NMR nomenclature. Nuclear spin properties and conventions for chemical shifts 1795–1818*
Nomenclature of structural and compositional characteristics of ordered microporous and mesoporous materials with inorganic hosts 381–394*
On the discovery of the elements 110–112 959–967R
Organic photochromism 639–665R
Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon) 1521–1553R
Retention parameters in chromatography. Part A. Hold-up volume concept in column chromatography. Part B. Retention parameters in gas chromatograpy 969–992*
Risk assessment for occupational exposure to chemicals. A review of current methodology 993–1031R
Selectivity in analytical chemistry 1381–1386*
Standards in isothermal microcalorimetry 1625–1639R
Unit "katal" for catalytic activity 927–931R
Use of Legendre transforms in chemical thermodynamics 1349–1380R

RECYCLING
Recoverable catalysts. Ultimate goals, criteria of evaluation, and the green chemistry interface 1319

RED EDGE EFFECT
Tryptophan rotamers that report the conformational dynamics of proteins 415

REDUCTION
Green twist to old theme. An ecofriendly approach 199
Solvent-free accelerated organic syntheses using microwaves 193

REDUCTION BEHAVIOR
New metallocenes of early transition metals with functional groups in organic ligands. Red-ox transformations 367

REFERENCING
NMR nomenclature. Nuclear spin properties and conventions for chemical shifts 1795*

REGIOISOMERS
Molecular recognition at kappa opioid receptors 1387

REMEDIATION
Polymer-metal complexes for environmental protection. Chemoremediation in the aqueous homogeneous phase 129

RESEARCH
Centre for Green Chemistry, Monash University, Australia 1251

RESIDUE LEVELS
Use and distribution of organochlorine pesticides. The future in Africa 1147

RESONANCE FREQUENCY RATIOS
NMR nomenclature. Nuclear spin properties and conventions for chemical shifts 1795*

REST STATE
Recoverable catalysts. Ultimate goals, criteria of evaluation, and the green chemistry interface 1319

RETENTION PARAMETERS
Retention parameters in chromatography. Part A. Hold-up volume concept in column chromatography. Part B. Retention parameters in gas chromatograpy 969*

RETINOIC ACID
Retinoic acid and analogs as potent inducers of differentiation and apoptosis. New promising chemopreventive and chemotherapeutic agents in oncology 1437

RETINOIDS
Retinoic acid and analogs as potent inducers of differentiation and apoptosis. New promising chemopreventive and chemotherapeutic agents in oncology 1437

RETINOPATHY
Semicarbazide-sensitive amine oxidase. Its physiological significance 1393

REVERSE ONUS
Implementing green chemistry. An environmental policy for sustainability 1231

REVERSE TRANSCRIPTASE (HIV)
New developments in anti-HIV chemotherapy 55

RHENIUM(I)
Molecular design of luminescent metal-based materials 543

RHODIUM
Quasi-nature catalysis. Rhodium-catalyzed C–C bond formation in air and water 1315
Rational design of polymers for optoelectronic interests 243
Recent advances in asymmetric catalysis. Synthetic applications to biologically active compounds 299

RHODIUM CATALYSIS
Interplay of synthesis and mechanism in asymmetric homogeneous catalysis 343

RIBOFLAVIN SYNTHASE
NMR spectroscopy in drug design 1429

RING-OPENING METATHESIS POLYMERIZATION
Rational design of polymers for optoelectronic interests 243

RISK
Risk assessment for occupational exposure to chemicals. A review of current methodology 993R

RISK ASSESSMENT
Implementing green chemistry. An environmental policy for sustainability 1231
Integrating green chemistry and sustainability into a specialty chemical company 1269
Modeling lifetime and degradability of organic compounds in air, soil, and water systems 1331R

ROSE BENGAL
New polymeric photosensitizers 491

RUBBER TOUGHENING
Blends containing core-shell impact modifiers. Part 1: Structure and tensile deformation mechanisms 897R

RUTALES
Strategies for the isolation and identification of trypanocidal compounds from the Rutales 617

RUTELINAE
Molecules and macromolecules involved in chemical communication of scarab beetles 613

RUTHENIUM
Racemic catalysis through asymmetric activation 255
Recent advances in asymmetric catalysis. Synthetic applications to biologically active compounds 299

RUTHENIUM CATALYSTS
Asymmetric hydrogenation via architectural and functional molecular engineering 227

RUTHENIUM DIHYDROGEN COMPLEX
Chemical nitrogen fixation by using molybdenum and tungsten complexes 261

SALEN
Asymmetric synthesis with "privileged" ligands 325

SALT LAKES
Treatment of Tunisian salt lakes using solubility phase diagrams 761

SAMP/RAMP HYDRAZONE METHOD
Efficient stereoselective syntheses of piperidine, pyrrolidine, and indolizidine alkaloids 573

SAMROCENES
Lewis-acidic organometallic compounds of the lanthanides and the alkaline earth metals as catalysts for the activation of carbonyl groups 279
SANDFLY
Recent results in the synthesis of ecologically important bioregulators 601
SANDWICH
Organometallic pentalene complexes 233
SAR
Antitumor acridines with diaminoalkylo pharmacophoric group 1421
SAR BY NMR
NMR spectroscopy in drug design 1429
SCHIFF BASES
Asymmetric synthesis with "privileged" ligands 325
SCIENTIFIC DATABASE
Reliable solubility data in the age of computerized chemistry. Why, how, and when? 825
SCREENING BY NMR
NMR spectroscopy in drug design 1429
SCROPHULARIACEAE
Chemistry and biotransformations in the Scrophulariaceae family 579
SCRUBBERS
Integrated emissions management for automotive painting operations 1277
SEDIMENTATION
Subtle order in settling suspensions 1679
SELECTED ATOMIC MASSES
Atomic weights of the elements 1999 667R
SELECTIVE COUPLING
Selective preparation of benzene derivatives from three different alkynes and pyridine derivatives from two different alkynes and a nitrile 271
SELECTIVE REACTION
Crystalline inclusion complexes as media of molecular recognitions and selective reactions 1137
SELECTIVITY
Effect of lignin content and magnesium-to-manganese ratio on the selectivity of oxygen delignification in softwood kraft pulp 2059
Reactivity and selectivity under microwaves in organic chemistry. Relation with medium effects and reaction mechanisms 161
Selectivity in analytical chemistry 1381*
SEMICARBAZIDE-SENSITIVE AMINE OXIDASE (SSAO)
Semicarbazide-sensitive amine oxidase. Its physiological significance 1393
SEMICONDUCTORS
Conjugated polymers. New materials for optoelectronic devices 425
SEMIOCHEMICALS
Molecules and macromolecules involved in chemical communication of scarab beetles 613
Pheromones and kairomones for contol of pest insects. Some current results from a Swedish research program 607
SENSITIZATION
Molecular photovoltaics mimic photosynthesis 459
New approach to silver halide photography using radical cation chemistry 455
SENSORS
Devices for ion-sensing and pX measurements 31
Electrochemical sensors for environmental monitoring. Strategy and examples 1969
Luminescent sensors and photonic switches 503
SEPARATION
Design, synthesis, and application of chelating polymers for separation and determination of trace and toxic metal ions. A green analytical method 181
SEQUENTIAL INJECTION ANALYSIS
Detecting and circumventing sources of inaccuracy in flow analysis 45
SI-DERIVED UNIT WITH SPECIAL NAME AND SYMBOL
Unit "katal" for catalytic activity 927R
SIDE-CHAIN FUNCTIONALIZED CYCLOPENTADIENYL LIGANDS
New metallocenes of early transition metals with functional groups in organic ligands. Red-ox transformations 367
SIGMA
Opioid and sigma receptor studies. New developments in the design of selective sigma ligands 1499
SIGMA BOND
Organometallic chemistry. Past, present, and future 205
SILANE
Reactions of d^0 alkylidene and amide complexes with silanes 331
SILVER HALIDE
New approach to silver halide photography using radical cation chemistry 455
SILYLENE-DIVINYLARENE COPOLYMERS
Rational design of polymers for optoelectronic interests 243
SILYLOLEFINATION
Rational design of polymers for optoelectronic interests 243
SIMULATION
Using simulation to study solvation in water 1721
SIMULTANEOUS MULTIELEMENTAL ANALYSIS
Evolution and revolution in instrumentation for plasma-source mass spectrometry 1579
SINGLE CLUSTER
Isolobal displacement methodology for the synthesis of transition-metal cluster complexes containing various biscyclopentadienyl ligands 305
SINGLE-MOLECULE DETECTION
Looking at the photodynamics of individual fluorescent molecules and proteins 431
SINGLET OXYGEN
New polymeric photosensitizers 491
SINGLET-TRIPLET ENERGY SPLITTING
Singlet and triplet energy splitting in the radical ion pairs generated by photoinduced electron-transfer reactions 519
SITE-DIRECTED MUTAGENESIS
Molecular recognition at kappa opioid receptors 1387
SMECTIC
Definitions of basic terms relating to low-molar-mass and polymer liquid crystals 845*
SOFTWOOD PULP
Effect of lignin content and magnesium-to-manganese ratio on the selectivity of oxygen delignification in softwood kraft pulp 2059
SOLAR CELL
Molecular photovoltaics mimic photosynthesis 459
SOLAR ENERGY
Figures-of-merit for the technical development and application of advanced oxidation technologies for both electric- and solar-driven systems 627R
SOLID ACIDS
Catalysis for green chemistry 103
SOLID SOLUBILITY
Solid-state solubility and its limits. The alkali halide case 807
SOLID SOLUTIONS
Solid-state solubility and its limits. The alkali halide case 807
SOLID-STATE REACTION
Crystalline inclusion complexes as media of molecular recognitions and selective reactions 1137
SOLID-STATE VOLTAMMETRY
Direct electrochemistry of nanoparticulate Fe_2O_3 in aqueous solution and adsorbed onto tin-doped indium oxide 1885
SOLID SUPPORTS
Reactivity and selectivity under microwaves in organic chemistry. Relation with medium effects and reaction mechanisms 161
SOLID/LIQUID INTERFACE
Ultrafast dynamics at solid/liquid interfaces as investigated by photothermal spectroscopy 1613
SOLID-PHASE SYNTHESIS
Integrating natural product synthesis and combinatorial chemistry 1033
New methods for high-throughput synthesis 1103
SOLID-SUPPORT
Applications of green chemistry in the manufacture of oligonucleotide drugs 175
SOLUBILITY
Solubility equilibria in multicomponent oceanic salt systems from t = 0 °C to 200 °C. Model parameterization and databases 831
Thermodynamic modeling of crystal deposition in humans 785
SOLUBILITY DATA
Reliable solubility data in the age of computerized chemistry. Why, how, and when? 825

SOLUBILITY DIAGRAMS
Treatment of Tunisian salt lakes using solubility phase diagrams 761
SOLVATION
Using simulation to study solvation in water 1721
SOLVATOCHROMISM
Dynamic solvatochromism in solvent mixtures 405
SOLVENT EFFECT
Vital role of entropy in photochirogenesis 475
SOLVENT-FREE
Benign by design. New catalysts for an environmentally conscious age 1087
Solvent-free accelerated organic syntheses using microwaves 193
Solvent-free preparation of ionic liquids using a household microwave oven 1309
SOLVENT-FREE REACTIONS
Reactivity and selectivity under microwaves in organic chemistry. Relation with medium effects and reaction mechanisms 161
SONOELECTROLYSIS
Degradation of dye effluent 1957
SONOELECTROSYNTHESIS
Biphasic sonoelectrosynthesis. A review 1947
SONOLYSIS
Degradation of dye effluent 1957
SONOVOLTAMMETRY
Direct electrochemistry of nanoparticulate Fe_2O_3 in aqueous solution and adsorbed onto tin-doped indium oxide 1885
SOURCE
Generic source-based nomenclature for polymers 1511*
SPECIAL RESEARCH CENTRE
Centre for Green Chemistry, Monash University, Australia 1251
SPECIATION
In situ speciation measurements. Using diffusive gradients in thin-films (DGT) to determine inorganically and organically complexed metals 9
Speciation dynamics and bioavailability of metals. Exploration of the case of two uptake routes 39
SPECTRO-CHROMOAMPEROMETRY
A glance into the bulk of solvent polymeric pH membranes 17
SPECTROPHOTOMETRY
Detecting and circumventing sources of inaccuracy in flow analysis 45
SPECTRO-POTENTIOMETRY
A glance into the bulk of solvent polymeric pH membranes 17
SPECTROSCOPY
Dynamic solvatochromism in solvent mixtures 405
Twentieth century developments in photochemistry. Brief historical sketches 395
SPIN-SELECTIVE INTERACTION
Singlet and triplet energy splitting in the radical ion pairs generated by photoinduced electron-transfer reactions 519
SPIN-COATING
Developments in CO_2 research 1281
SPIRO
Generic source-based nomenclature for polymers 1511*
SPONTANEOUS FISSION
Errata: Spontaneous fission half-lives for ground-state nuclides. IUPAC Technical Report, Pure Appl. Chem. 72, 1525-1562 (2000) 1225R
SR-121463
Chemical development of the vasopressin receptor 2 antagonist SR-121463 1401
SSAO
Semicarbazide-sensitive amine oxidase. Its physiological significance 1393
STABILITY CONSTANTS
Critical evaluation of stability constants of phosphonic acids 1641R
STABILIZATION
Development of a new amperometric biosensor based on polyphenoloxidase and polyethersulphone membrane 1993
STANDARDS
Standards in isothermal microcalorimetry 1625R
STATISTICS
Subtle order in settling suspensions 1679
STD-NMR
NMR spectroscopy in drug design 1429
STEMARANES
Chemistry and biotransformations in the Scrophulariaceae family 579
STEREOSELECTIVE SYNTHESIS
Rational design and synthesis of homochiral azole antifungal agents 1477
STEREOSELECTIVITY
Asymmetric synthesis by stereocontrol 283
STM
New inhibitors for copper corrosion 1861
STRUCTURE BREAKING
Using simulation to study solvation in water 1721
STRUCTURE–ACTIVITY RELATIONSHIP (SAR)
Antitumor acridines with diaminoalkylo pharmacophoric group 1421
SULFATE-REDUCING BACTERIA
Devices for ion-sensing and pX measurements 31
SUM-FREQUENCY VIBRATIONAL SPECTROSCOPY
Exploring new opportunities with sum-frequency nonlinear optical spectroscopy 1589
SUPERCRITICAL CARBON DIOXIDE
Low-temperature manufacturing of fine pharmaceutical powders with supercritical fluid aerosolization in a Bubble Dryer® 1299
SUPERCRITICAL CO_2
Supercritical fluid extraction of Z-sabinene hydrate-rich essential oils from Romanian mentha hybrids 1287
SUPERCRITICAL FLUID CHROMATOGRAPHY
Retention parameters in chromatography. Part A. Hold-up volume concept in column chromatography. Part B. Retention parameters in gas chromatograpy 969*
SUPERCRITICAL FLUID EXTRACTION
Using neoteric solvents in oil shale studies 153
SUPERCRITICAL FLUIDS
Organometallic alkane and noble-gas complexes in conventional and supercritical fluids 443
Supercritical fluids-assisted micronization techniques. Low-impact routes for particle production 1293
SUPERCRITICAL SOLUTIONS
Using simulation to study solvation in water 1721
SUPRAMOLECULAR SYSTEMS
Charge separation and energy transfer in multicomponent porphyrinic arrays 421
SURFACES AND INTERFACES
Exploring new opportunities with sum-frequency nonlinear optical spectroscopy 1589
SURFACTANT ANALYSIS
Devices for ion-sensing and pX measurements 31
SURFACTANTS
Developments in CO_2 research 1281
SURINAME
Biodiversity conservation and drug discovery in Suriname. Explorations in nature's combinatorial library 595
SUSPENSIONS
Subtle order in settling suspensions 1679
SUSTAINABILITY
Centre for Green Chemistry, Monash University, Australia 1251
Emergence of a sustainable business community 1265
Green chemistry as systems science 1243
SUSTAINABLE
Green chemistry and the global water crisis 1237
Green electrochemistry. Examples and challenges 1305
SUSTAINABLE CONSUMPTION
Integrating green chemistry and sustainability into a specialty chemical company 1269
SUSTAINABLE DEVELOPMENT
Emergence of a sustainable business community 1265
Integrating green chemistry and sustainability into a specialty chemical company 1269
Sustainability metrics for vehicles 1273
SUZUKI REACTION
Solvent-free preparation of ionic liquids using a household microwave oven 1309
SWEEPING
Capillary electrophoretic techniques toward the metabolome analysis 1563

SWITCHES
Luminescent sensors and photonic switches 503
SYLVINITE
Treatment of Tunisian salt lakes using solubility phase diagrams 761
SYNTHESIS
Electron-transfer dyads suitable for novel self-assembled light-harvesting antenna/electron-transfer devices 469
Isolation, identification, synthesis, and bioefficacy of female *Diacrisia obliqua* (Arctiidae) sex pheromone blend. An Indian agricultural pest 1157
Quasi-nature catalysis. Rhodium-catalyzed C–C bond formation in air and water 1315
Recoverable catalysts. Ultimate goals, criteria of evaluation, and the green chemistry interface 1319
Studies directed toward the preparation of key intermediates for the synthesis of trisporic acids and cassiol 623
SYNTHETIC INHIBITORS
New small-molecule tubulin inhibitors 1459
TAML CATALYSTS
Green chemistry. Sustaining a high-technology civilization 113
TARGET IDENTIFICATION
Combinatorial chemistry. Facing the challenge of chemical genomics 1487
TAT PROTEIN INHIBITION
Synthesis of nucleoside analogs and new Tat protein inhibitors 1189
TEACHING
Teaching green chemistry. Third-year-level module and beyond 1257
TECHNOLOGY
Continuing evolution of the drug discovery process in the pharmaceutical industry 67
TEMPERATURE
Status of organochlorine (DDT) pollutants and steps toward electrocatalytic reductions 1907
TEMPERATURE EFFECT
Vital role of entropy in photochirogenesis 475
TENSILE DILATOMETRY
Blends containing core-shell impact modifiers. Part 1: Structure and tensile deformation mechanisms 897R
TERMINOLOGY IN ISOTHERMAL MICROCALORIMETRY
Standards in isothermal microcalorimetry 1625R
TERMS OF LIPID NUTRITION
Lexicon of lipid nutrition 685R
TERPENES
Biodiversity conservation and drug discovery in Suriname. Explorations in nature's combinatorial library 595
TEST REACTIONS
Standards in isothermal microcalorimetry 1625R
TETRAHEDRAL HETERONUCLEAR CLUSTER
Isolobal displacement methodology for the synthesis of transition-metal cluster complexes containing various biscyclopentadienyl ligands 305
THENARDITE
Treatment of Tunisian salt lakes using solubility phase diagrams 761
THERMAL ANALYSIS UNDER HIGH PRESSURE
Phase diagrams at high temperature and high pressure. Determination and consequent developments 771
THERMAL DENATURATION
Measurement and analysis of results obtained on biological substances with differential scanning calorimetry 745R
THERMOCHEMICAL DATA
Reliable solubility data in the age of computerized chemistry. Why, how, and when? 825
THERMOCHROMISM
Dynamic solvatochromism in solvent mixtures 405
THERMODYNAMIC ANALYSIS
Solid-state solubility and its limits. The alkali halide case 807
THERMODYNAMICS
Use of Legendre transforms in chemical thermodynamics 1349R
THERMO-RESPONSIVE PHOTOSENSITIZERS
New polymeric photosensitizers 491
THIOACYLAMIDINES
Synthesis of nucleoside analogs and new Tat protein inhibitors 1189
THIOAZAHETEROCYCLES
Synthesis of nucleoside analogs and new Tat protein inhibitors 1189
THIOLATE
Novel polymerization and copolymerization of ethylene, styrene, and/or butadiene by new organolanthanide-based catalysts 291
THREADING INTERCALATION
Threading intercalation to double-stranded DNA and the application to DNA sensing. Electrochemical array technique 1573
TIAPROFENIC ACID
Photosensitization by drugs 481
TIME-OF-FLIGHT MASS SPECTROMETRY
Evolution and revolution in instrumentation for plasma-source mass spectrometry 1579
TIME-RESOLVED FLUORESCENCE
Electron-transfer dyads suitable for novel self-assembled light-harvesting antenna/electron-transfer devices 469
TIME-RESOLVED INFRARED SPECTROSCOPY
Organometallic alkane and noble-gas complexes in conventional and supercritical fluids 443
TIME-RESOLVED SPECTROSCOPY
Twentieth century developments in photochemistry. Brief historical sketches 395
Ultrafast dynamics at solid/liquid interfaces as investigated by photothermal spectroscopy 1613
TITANIA-BASED HETEROGENEOUS PHOTOCATALYSIS
Titania-based heterogeneous photocatalysis. Materials, mechanistic issues, and implications for environmental remediation 1849
TITANIUM
Asymmetric synthesis with "privileged" ligands 325
Racemic catalysis through asymmetric activation 255
TITANIUM-SILICON-NITRIDE
Reactions of d^0 alkylidene and amide complexes with silanes 331
TOF (TURNOVER FREQUENCY)
Recoverable catalysts. Ultimate goals, criteria of evaluation, and the green chemistry interface 1319
TOF-SIMS
Use of TOF-SIMS for the analysis of surface metals in H_2O_2-bleached lignocellulosic fibers 2047
TON (TURNOVER NUMBER)
Recoverable catalysts. Ultimate goals, criteria of evaluation, and the green chemistry interface 1319
TOXIC METAL IONS
Design, synthesis, and application of chelating polymers for separation and determination of trace and toxic metal ions. A green analytical method 181
TRACE METAL IONS
Design, synthesis, and application of chelating polymers for separation and determination of trace and toxic metal ions. A green analytical method 181
TRACE METALS
Speciation dynamics and bioavailability of metals. Exploration of the case of two uptake routes 39
TRACEABILITY
Detecting and circumventing sources of inaccuracy in flow analysis 45
TRAFFIC AIR POLLUTION
Human exposure to traffic pollution. Experience from Danish studies 137
TRANSCRIPTION (HIV)
New developments in anti-HIV chemotherapy 55
TRANSFERMIUM
On the discovery of the elements 110-112 959R
TRANSFORMED CHEMICAL POTENTIAL
Use of Legendre transforms in chemical thermodynamics 1349R
TRANSFORMED ENTHALPY
Use of Legendre transforms in chemical thermodynamics 1349R
TRANSFORMED GIBBS ENERGY
Use of Legendre transforms in chemical thermodynamics 1349R
TRANSGENESIS
Gains achieved by molecular approaches in the area of lignification 561
TRANSIENT ABSORPTION SPECTROSCOPY
Electron-transfer dyads suitable for novel self-assembled light-harvesting antenna/electron-transfer devices 469
TRANSIENT GRATING
Protein dynamics detected by the time-resolved transient grating technique 513

TRANSIENT REFLECTING GRATING (TRG)
Ultrafast dynamics at solid/liquid interfaces as investigated by photothermal spectroscopy 1613
TRANSISTOR
Conjugated polymers. New materials for optoelectronic devices 425
TRANSITION ENTHALPY AND ENTROPY
Measurement and analysis of results obtained on biological substances with differential scanning calorimetry 745R
TRANSITION-METAL OXIDES
Nanostructured amorphous metals, alloys, and metal oxides as new catalysts for oxidation 85
TRANSITION METALS
Applications of "planar-chiral" heterocycles in asymmetric catalysis 1113
Asymmetric catalysis with "planar-chiral" heterocycles 347
New class of metallacarboranes incorporating the η^7-carboranyl ligand 361
Photoactive pyrene-containing receptors for transition-metal ions 411
TRANSITION TEMPERATURE
Measurement and analysis of results obtained on biological substances with differential scanning calorimetry 745R
TRANSITION-METAL CLUSTER
Isolobal displacement methodology for the synthesis of transition-metal cluster complexes containing various biscyclopentadienyl ligands 305
TRANSLATION CENTER
Strategy for globalization of chemical education based on the Internet 1125
TRANSLATION SOFTWARE
Strategy for globalization of chemical education based on the Internet 1125
TRANSMEITNERIUM
On the discovery of the elements 110-112 959R
TRIBROMIDES
Peroxo metal-mediated environmentally favorable route to brominating agents and protocols for bromination of organics 93
TRICARBONYLIRON COMPLEXES
Recent applications of tricarbonyliron-diene complexes to organic synthesis 1075
TRIOXAQUINE
From classical antimalarial drugs to new compounds based on the mechanism of action of artemisinin 1173
TRIPHENYLENE ANALOGS
Synthesis of nucleoside analogs and new Tat protein inhibitors 1189
TRIPLE CLUSTER
Isolobal displacement methodology for the synthesis of transition-metal cluster complexes containing various biscyclopentadienyl ligands 305
TRIPLET STATE
Twentieth century developments in photochemistry. Brief historical sketches 395
TRIRUTHENIUM CLUSTER
Alkane activation on a multimetallic site 315
TRISPORIC ACIDS
Studies directed toward the preparation of key intermediates for the synthesis of trisporic acids and cassiol 623
TRITIUM
Names for muonium and hydrogen atoms and their ions 377*
TROPICAL NEEDS
Use and distribution of organochlorine pesticides. The future in Africa 1147
TRYPANOSOMA CRUZI
Strategies for the isolation and identification of trypanocidal compounds from the Rutales 617
TRYPTOPHAN FLUORESCENCE
Tryptophan rotamers that report the conformational dynamics of proteins 415
TRYPTOPHAN PHOSPHORESCENCE
Tryptophan rotamers that report the conformational dynamics of proteins 415
TSETSE FLY
Recent results in the synthesis of ecologically important bioregulators 601
TUBULIN POLYMERIZATION
New small-molecule tubulin inhibitors 1459
TUNGSTEN
New methods for the synthesis of transition-metal fullerene complexes 287
TUNGSTEN DINITROGEN COMPLEX
Chemical nitrogen fixation by using molybdenum and tungsten complexes 261
TURNOVER FREQUENCY (TOF)
Recoverable catalysts. Ultimate goals, criteria of evaluation, and the green chemistry interface 1319
TURNOVER NUMBER (TON)
Recoverable catalysts. Ultimate goals, criteria of evaluation, and the green chemistry interface 1319
TWO-PHOTON ORGANIC PHOTOCHROMISM
Organic photochromism 639R
ULTRAFAST MOLECULAR PROCESSES
Coherent control for ultrafast photochemical reactions 525
ULTRAFAST PHOTOTHERMAL PHENOMENON
Ultrafast dynamics at solid/liquid interfaces as investigated by photothermal spectroscopy 1613
ULTRASOUND
Direct electrochemistry of nanoparticulate Fe_2O_3 in aqueous solution and adsorbed onto tin-doped indium oxide 1885
UNDERGRADUATE
Teaching green chemistry. Third-year-level module and beyond 1257
UNESCO
UNESCO/IUPAC–CTC global program in microchemistry 1215
UNSATURATED HYDROCARBON
Novel coordination behavior of unsaturated hydrocarbon ligands on Pd–Pd bonds 295
UNUNBIUM
On the discovery of the elements 110-112 959R
UNUNNILIUM
On the discovery of the elements 110-112 959R
UNUNUNIUM
On the discovery of the elements 110-112 959R
UPTAKE
Status of organochlorine (DDT) pollutants and steps toward electrocatalytic reductions 1907
UPTAKE ROUTES
Speciation dynamics and bioavailability of metals. Exploration of the case of two uptake routes 39
URANIUM
Dissolution and formation of nuclear materials in molten media 799
UREASE
Bioactive natural products as a potential source of new pharmacophores. A theory of memory 555
URIC ACID
Thermodynamic modeling of crystal deposition in humans 785
UROLITHIASIS
Thermodynamic modeling of crystal deposition in humans 785
USE AND DISTRIBUTION
Use and distribution of organochlorine pesticides. The future in Africa 1147
VASCULAR COMPLICATIONS
Semicarbazide-sensitive amine oxidase. Its physiological significance 1393
VASOPRESSIN RECEPTOR 2 ANTAGONIST
Chemical development of the vasopressin receptor 2 antagonist SR-121463 1401
VEHICLE ENVIRONMENTAL METRICS
Sustainability metrics for vehicles 1273
VIBRATIONAL WAVE NUMBERS
Quantum chemical B3LYP/cc-pvqz computation of ground-state structures and properties of small molecules with atoms of $Z \leq 18$ (hydrogen to argon) 1521R
VISCOSITY
Blends containing core-shell impact modifiers. Part 2: Melt rheology of rubber-toughened plastics 913R
VITAMIN E
Some newer aspects of organozirconium chemistry of relevance to organic synthesis. Zr-Catalyzed enantioselective carbometallation 239
VOC EMISSIONS
Integrated emissions management for automotive painting operations 1277

VOLTAMMETRY
Status of organochlorine (DDT) pollutants and steps toward electrocatalytic reductions 1907
WASH LIQUORS
Devices for ion-sensing and pX measurements 31
WATER
Green chemistry and the global water crisis 1237
Green chemistry as systems science 1243
Quasi-nature catalysis. Rhodium-catalyzed C–C bond formation in air and water 1315
WATER TREATMENT
Hydrolyzing metal salts as coagulants 2017
WATER-SOLUBLE
Polymer-metal complexes for environmental protection. Chemoremediation in the aqueous homogeneous phase 129
WIND TUNNEL
Isolation, identification, synthesis, and bioefficacy of female *Diacrisia obliqua* (Arctiidae) sex pheromone blend. An Indian agricultural pest 1157
WORKPLACE
Risk assessment for occupational exposure to chemicals. A review of current methodology 993R
XANTHINE
Thermodynamic modeling of crystal deposition in humans 785
YIELDING OF MELTS
Blends containing core-shell impact modifiers. Part 2: Melt rheology of rubber-toughened plastics 913R
YOHIMBANE ALKALOIDS
Recent applications of tricarbonyliron-diene complexes to organic synthesis 1075
ZEOLITE FRAMEWORK TYPE
Nomenclature of structural and compositional characteristics of ordered microporous and mesoporous materials with inorganic hosts 381*
ZEOLITES
Nomenclature of structural and compositional characteristics of ordered microporous and mesoporous materials with inorganic hosts 381*
ZERO DISCHARGE
Implementing green chemistry. An environmental policy for sustainability 1231
ZIRCONACYCLOPENTADIENE
Selective preparation of benzene derivatives from three different alkynes and pyridine derivatives from two different alkynes and a nitrile 271
ZIRCONIUM
New metallocenes of early transition metals with functional groups in organic ligands. Red-ox transformations 367
Zr CATALYSIS
Some newer aspects of organozirconium chemistry of relevance to organic synthesis. Zr-Catalyzed enantioselective carbometallation 239
Z-SABINENE HYDRATE
Supercritical fluid extraction of Z-sabinene hydrate-rich essential oils from Romanian mentha hybrids 1287
